**Near-rings and Their Links with Groups** J. D. P. Meldrum, 1985      **Near-Rings and Near-Fields** Yuen Fong, Howard E. Bell, Wen-Fong Ke, Gordon Mason, G.F. Pilz, 2012-12-06 Near Rings and Near Fields opens with three invited lectures on different aspects of the history of near ring theory These are followed by 26 papers reflecting the diversity of the subject in regard to geometry topological groups automata coding theory and probability as well as the purely algebraic structure theory of near rings Audience Graduate students of mathematics and algebraists interested in near ring theory

Near-Rings and Near-Fields G. Betsch, 2011-09-22 Most topics in near ring and near field theory are treated here along with an extensive introduction to the theory There are two invited lectures Non Commutative Geometry Near Rings and Near Fields which indicates the relevance of near rings and near fields for geometry while Pseudo Finite Near Fields shows the impressive power of model theoretic methods The remaining papers cover such topics as D G near rings radical theory KT near fields matrix near rings and applications to systems theory      **Near-rings: The Theory and its Applications**

, 2011-10-10 Near rings The Theory and its Applications      **The Theory of Near-Rings** Robert Lockhart, 2021-11-14 This book offers an original account of the theory of near rings with a considerable amount of material which has not previously been available in book form some of it completely new The book begins with an introduction to the subject and goes on to consider the theory of near fields transformation near rings and near rings hosted by a group The bulk of the chapter on near fields has not previously been available in English The transformation near rings chapters considerably augment existing knowledge and the chapters on product hosting are essentially new Other chapters contain original material on new classes of near rings and non abelian group cohomology The Theory of Near Rings will be of interest to researchers in the subject and more broadly ring and representation theorists The presentation is elementary and self contained with the necessary background in group and ring theory available in standard references      **Rings, Groups, and Algebras** X. H.

Cao, 2020-12-22 Integrates and summarizes the most significant developments made by Chinese mathematicians in rings groups and algebras since the 1950s Presents both survey articles and recent research results Examines important topics in Hopf algebra representation theory semigroups finite groups homology algebra module theory valuation theory and more
