**ABC of Clinical Communication** Nicola Cooper, John Frain, 2017-10-23 Clinical communication underpins safe patient care The effective health professional sees illness through the patient's eyes and understands what matters most to him or her Effectiveness means gathering hard clinical data about the physical changes affecting the patient understanding why the patient is concerned conveying this to other health care professionals and involving the patient at every stage of management decisions The evidence for good clinical communication is well established although there are challenges While listening is the basis of sound diagnosis and clinical reasoning its absence affects patient outcomes particularly when patients are not permitted to make their concerns known or when there are gaps in information flow or communication between the professionals caring for them The ABC of Clinical Communication considers the evidence pertinent to individual encounters between patients and their health professionals how to achieve efficient flow of information the function of clinical teams and developing a teaching programme Topics covered include The consultation Clinical communication and personality type Shared decision making Communication in clinical teams Communication in medical records Communication in specific situations including mental health and end of life Teaching clinical communication The chapter authors are clinicians involved in communicating with patients research and training healthcare professionals of the future This team reflects the multidisciplinary approach required to develop effective clinical communication

*Narrative Structure and Narrative Knowing in Medicine and Science* Martina King, Tom

Kindt,2023-11-20 It has become a truism that we all think in the narrative mode both in everyday life and in science But what does this mean precisely Scholars tend to use the term narrative in a broad sense implying not only event sequencing but also the representation of emotions basic perceptual processes or complex analyses of data sets The volume addresses this blind spot by using clear selection criteria only non fictional texts by experts are analysed through the lens of both classical and postclassical narratology from Aristotle to quantum physics and from nineteenth century psychiatry to early childhood psychology they fall under various genres such as philosophical treatises case histories textbooks medical reports video clips and public lectures The articles of this volume examine the central but continuously shifting role that event sequencing plays within scholarly and scientific communication at various points in history and the diverse functions it serves such as eye witnessing making an argument inferencing or reasoning Thus they provide a new methodological framework for both literary scholars and historians of science and medicine
