Medical Botany Plants Affecting Human Health:

Medical Botany Walter H. Lewis, Memory P. F. Elvin-Lewis, 2003-09-04 Organized by body system and ailment makes it easy to locate appropriate therapies Includes background on the physiology of major systems and ailments so readers can understand how and why a pharmaceutical botanical or dietary supplement works Broad coverage includes green plants fungi and microorganisms Includes extensive references and citations from both conventional and complimentary alternative medical systems when natural products or their derivatives are involved **Medical Botany**, 1979 **Duke's Handbook of Medicinal Plants of Latin America** James A. Duke, 2008-10-24 Finalist for 2009 The Council on Botanical Horticultural Libraries Literature Award A Comprehensive Guide Addressing Safety Efficacy and Suitability About a quarter of all the medicines we use come from rainforest plants and more than 1 400 varieties of tropical plants are being investigated as potential cures for cancer Curare comes from **Laurie Phippen's All Natural Antibacterial Agents** Laurie Phippen, 2015-05-24 The classification antibacterial includes anything that destroys bacteria or inhibits the ability of bacteria to grow and reproduce Herbals approach bacterial infection from two directions They stimulate the immune system to produce more immune cells aiding your body's ability to fight the infection and they act in direct opposition to bacteria by inhibiting their ability to grow and reproduce so they cannot survive The first line of defense against bacterial infection is prevention Disinfecting surfaces with known antibacterial cleaners maintaining good health through diet rest and exercise and minimizing exposure to infectious agents is far more effective than any treatment plan in the continued battle against bacteria Regardless of the preventative care you take there are always times where treating an infection will be necessary Traditionally bacterial infection is fought by blending herbals that support the body's own natural defenses with those that act to inhibit and kill the bacteria Using a combination that blends both actions helps to minimize the duration and severity of any infection Many herbs and oils act as natural immunostimulant and antibacterial agents Some of these natural products work as well as or even better than the products sold in your local pharmacy Some of the items in your local pharmacy are even created based on the chemical constituents of plants you might have growing in your own yard This guide contains antibacterial agents that act as both disinfectants for infected air and surfaces and disease fighting agents for the body Both categories eliminate harmful bacteria It is important that you read the traditional uses and side effects of each plant and discuss any alternative treatment with a qualified herbalist or physician prior to choosing a natural product Botanical Medicine in Clinical Practice Ronald Ross Watson, Victor R. Preedy, 2008 The potential benefits of plants and plant extracts in the treatment and possible prevention of many leading health concerns are historically well known and are becoming more widely studied and recognized within the medical community It is these studies that led to the first compilation of new research developments identifying new extracts and uses for plants in disease prevention and treatment This major comprehensive reference work contains contributions from more than 150 clinical and academic experts covering topics such

as treatments of cancer and cardiovascular diseases as well as historical plant use by indigenous people supported by recent scientific studies Authors review the safety and efficacy of botanical treatments while identifying the sources historical supportive data and mechanisms of action for emerging treatments Written by researchers currently carrying out identification and biomedical testing this is the most up to date text on the latest research from all over the world It is an essential resource for health care practitioners and herbalists as well as researcher students and professionals in botany and alternative medicine

Health Tradition Among Dimasa Tribe Madhumita Nath,Biman Kumar Dutta,P. K. Hajra,2016

What Have Plants Ever Done for Us? Stephen Harris,2015 When did the British Government become the world s largest drugs pusher What tree is frequently used to treat cancer Which everyday condiment is the most widely traded spice on the planet Plants are an indispensable part of our everyday life From the coffee bush and grass for cattle which give us milk for our cappuccinos to the rubber tree which produces tyres for our cars our lives are inextricably linked to the world of plants Taking us on a chronological journey Stephen Harris identifies fifty plants that have been key to the development of the Western world discussing trade politics medicine travel and chemistry along the way Plants have provided paper and ink chemicals that could kill or cure vital sustenance and stimulants Some such as barley have been staples from earliest times others such as oil palm are newcomers to Western industry Moreover with time uses change beets which have been used variously as a treatment for leprosy source of sugar and animal feed are now showing potential as biofuels What may the future hold for mandrake or woad We remain dependent on plants for our food our fuel and our medicines Their effects on our lives as the stories in this wide ranging and engaging book demonstrate continue to be profound and often unpredictable

Systematic Botany, Plant Utilization and Biosphere Conservation Inga Hedberg,1979 **Ethnomedicine** Pamela Irene Erickson,2008 Erickson fills this gap by clearly explaining the basic organizing principles that underlie all medical systems the full range of theories of disease causation the geographical distribution of medical practices and the historical trends that led to biomedical dominance Her efficient balanced approach highlights commonalities among the world s vast and diverse medical systems making ethnomedicine easier to internalize and to apply in clinical settings
