**Family Medicine** J. L. Buckingham,E. P. Donatelle,W. E. Jacott,M. G. Rosen,Robert B. Taylor,2013-06-29 JOHN S MILLIS  
In 1966 the Citizens Commission on Graduate Medical Education observed that the explosive growth in biomedical science  
and the consequent increase in medical skill and technology of the twentieth century had made it possible for physicians to  
respond to the episodes of illness of patients with an ever increasing effectiveness but that the increase in knowledge and  
technology had forced most physicians to concentrate upon a disease entity an organ or organ system or a particular mode of  
diagnosis or therapy As a result there had been a growing lack of continuing and comprehensive patient care The  
Commission expressed the opinion that Now in order to bring medicine s enhanced diagnostic and therapeutic powers fully  
to the benefit of society it is necessary to have many physicians who can put medicine together again The Commission  
proceeded to recommend the education and training of sub stantial numbers of Primary Physicians who would by assuming  
primary responsi bility for the patient s welfare in sickness and in health provide continuing and comprehensive health care  
to the citizens of the United States In 1978 it is clear that the recommendation has been accepted by the public the medical  
profession and medical education There has been a vigorous response in the development of family medicine and in the fields  
of internal medicine pediatrics and obstetrics One is particularly impressed by the wide acceptance on the part of medical
