## **Medtronic Contour Link Manual:**

**Current Trends in Diabetes** Viswanathan Mohan, MA Shekar, Gundu HR Rao, 2020-11-30 Diabetes is a disease that occurs when the pancreas does not produce enough insulin to control the amount of glucose in the blood. This book is a comprehensive guide to the latest advances in the diagnosis and treatment of diabetes. Divided into six sections, the manual begins with an overview of diagnosis and classification followed by discussion on epidemiology and aetiopathogenesis. Section four covers comorbidities and complications of diabetes including hyper and hypoglycaemia, heart failure, foot ulcers and diabetic retinopathy. The final sections examine recent advances and technologies. The detailed text is further enhanced by clinical photographs, diagrams, and tables to assist learning. Key points: Comprehensive guide to latest advances in diagnosis and management of diabetes. Discusses diagnosis and classification, epidemiology and aetiopathogenesis. Covers many different comorbidities and complications. Highly illustrated with clinical photographs, diagrams, and tables.

**Advances in Diabetes Technology** Sarah Fishman, 2024-12-17 This book aims to provide the reader with a comprehensive overview of the most recent advances in the use of technology to support the treatment of diabetes. It discusses not only the evidence supporting these technologies but also the practicalities of their use. Few resources are available to guide the clinical provider in the choice and application of glucose sensing systems and insulin delivery devices to improve clinical outcomes. Advances in Diabetes Technology is intended to provide such a resource. While the use of these technologies is relatively common in the outpatient setting, their use in the inpatient setting is becoming increasingly common. This book is designed to help both the inpatient and outpatient clinical provider to recognize and understand diabetes technology and the ways in which it can be used during acute and critical illness. In addition, it explores software algorithms used to develop automated treatment plans and apps used by patients independently of direct involvement by their physician. Lastly, this book discusses do-it-yourself technologies used and developed by patients outside of the traditional care setting and without the professional guidance to modify and enhance existing technologies for customized use. The use of DIY diabetes technologies is promoted on social media and has been adopted by many younger patients. Familiarity with this emerging brand of diabetes technology is needed to ensure clinicians understand their patients and their management of diabetes.
