Memo November 2013 Physical Science:

The Secure and the Dispossessed Nick Buxton, Ben Hayes, 2015-11-20 While the world's scientists and many of its inhabitants despair at the impact of climate change corporate and military leaders see nothing but opportunities For them melting ice caps mean newly accessible fossil fuels borders to be secured from climate refugees social conflicts to be managed and more failed states in which to intervene They are securing their assets at the expense of the planet and its inhabitants The Secure and the Dispossessed looks at these deadly approaches with a critical eye It also considers the flip side that the legitimacy of the elite is under unprecedented pressure from resistance by communities to resource grabs to those creating new ecological and socially just models for managing our energy food and water Topics covered include geoengineering militarism refugee protection greenwashing and the agricultural crisis among others Adaptation and resilience to a climate changed world is desperately needed but the form it will take will affect all of our futures

Disorder and the Disinformation Society Jonathan Paul Marshall, James Goodman, Didar Zowghi, Francesca da Rimini, 2015-04-17 This book is the first general social analysis that seriously considers the daily experience of information disruption and software failure within contemporary Western society Through an investigation of informationalism defined as a contemporary form of capitalism it describes the social processes producing informational disorder While most social theory sees disorder as secondary pathological or uninteresting this book takes disordering processes as central to social life The book engages with theories of information society which privilege information order offering a strong counterpoint centred on disinformation Disorder and the Disinformation Society offers a practical agenda arguing that difficulties in producing software are both inherent to the process of developing software and in the social dynamics of informationalism It outlines the dynamics of software failure as they impinge on of information workers and on daily life explores why computerized finance has become inherently self disruptive asks how digital enclosure and intellectual property create conflicts over cultural creativity and disrupt informational accuracy and scholarship and reveals how social media can extend but also distort the development of social movements

Research Report NIFS-PROC Series, 2016-07 *America's Search for Security* Sean Kay, 2014-07-22 This book details the ways in which America's ascendancy to global superpower status was the result of its dueling foreign policy philosophies and forces an historically expansive idealism balanced with an equally constant realist restraint In America's Search for Security Sean Kay surveys major historical trends in American foreign policy and provides a new context for thinking about America's rise to power from the founding period through the end of the Cold War It details the post Cold War rise of idealist foreign policy goals and the costs of abandoning realist roots analyzing in depth the wars in Iraq and Afghanistan as examples of what disappointing if not disastrous outcomes can befall America abroad when foreign policy objectives are muddled unclear and fail to remain grounded in what historically has made America an unquestionable world power This book also focuses on America's recent pivot to Asia and efforts to restore

a realist balance abroad and at home in the second Obama administration concluding with a look at what the future of American power will look like in a rapidly evolving world in need of newer more modernized and adaptable forms of leadership Tracing the tension between idealism and realism Kay provides a detailed explanation of the rise of a post Cold War idealist consensus in Washington D C and shows how that culminated in a return to realism in both the 2013 debates over intervention in Syria and the 2014 crisis with Russia **Science Reports of Niigata University** ,2014-10 *Climate Change and the Coast* Bruce Glavovic,Mick Kelly,Robert Kay,Ailbhe Travers,2014-12-04 Coastal communities are at the frontline of a changing climate Escalating problems created by sea level rise a greater number of severe coastal storms and other repercussions of climate change will exacerbate already pervasive impacts resulting from rapid coastal population growth and intensification of development To prosper in the coming deca *CERN Courier* ,2013 Dynamic Industrial Policy in Africa United Nations.
