Militarizing The Environment Climate Change And The Security State:

Militarizing the Environment Robert P. Marzec,2015-12-21 As the seriousness of climate change becomes more and more obvious military institutions are responding by taking a prominent role in the governing of environmental concerns engaging in climate change war games and preparing for the effects of climate change from conflicts due to loss of food water and energy to the mass migration of millions of people displaced by rising sea levels This combat oriented stance stems from a self destructive pattern of thought that Robert P Marzec names environmentality an attitude that has been affecting human environmental relations since the seventeenth century Militarizing the Environment traces the rise of this influential mindset in America and other nations that threatens to supplant ideas of sustainability with demands for adaptation In this extensive historical study of scientific military political and economic formations across five centuries Marzec reveals how environmentality has been instrumental in the development of today s security society informing the creation of the military industrial complex during World War II and the National Security Act that established the CIA during the Cold War Now embedded in contemporary Western thought environmentality has even infiltrated scientific thinking transforming Darwinian insights into a quasi theology that makes security the biological basis of existence Marzec exposes the self destructive nature of this increasingly accepted worldview and offers alternatives that counter the blind alleys of national and global security

Covid's Chronicities Lenore Manderson,Nancy J. Burke,2025-04-28 COVID 19 continues to cause severe morbidity and ongoing mortality Covid s Chronicities documents the shifts that have occurred in the face of the pandemic the state and community responses to it its continuing toll on health services economies and communities and its compounding effects on people s health lives and livelihoods This volume draws on research from across Europe North and Latin America Asia and Africa providing surprising contrasts and consistencies of experience As the pandemic has shifted from urgency to chronic unpredictability everywhere people have struggled to make sense of state actions in infection control testing strategies and the roll out of vaccines and to remake social life The contributing authors illustrate with poignancy how chronic social problems and pandemic effects have worked bidirectionally compounding multiple inequalities and exacerbating for some despair and disassociation They also demonstrate the ingenuity of communities of Indigenous ways of knowing and providing care in some settings and elsewhere the power of robust local community networks and informal innovations While this book exposes the pandemic s exploitation of deep structures of state and societal neglect and describes the resultant morass it also illustrates the determination and imaginations of caring communities to withstand Covid s harms *Picture Ecology* Alan C. Braddock,Maura Coughlin,T. J. Demos,Rachael Z. DeLue,Mónica Domínguez Torres,Finis Dunaway,Stephen F. Eisenman,Emily Gephart,De-nin D. Lee,Gregory Levine,Anne McClintock,James Nisbet,Andrew Patrizio,Sugata Ray,Greg M. Thomas,2021-10-26 Seeking a broad reexamination of visual culture through the lenses of ecocriticism environmental justice and animal studies this compendium offers a diverse range of art historical criticism formulated within an ecological context

Picture Ecology brings together scholars whose contributions extend chronologically and geographically from 11th century Chinese painting to contemporary photography of California wildfires. The book's 17 interdisciplinary essays provide a dynamic cross cultural approach to an increasingly vital area of study emphasizing the environmental dimensions inherent in the content and materials of aesthetic objects. Picture Ecology provides valuable new approaches for considering works of art in ways that are timely intellectually stimulating and universally significant.

Environmental Security Rita Floyd, Richard

A. Matthew, 2013 Economic development, population growth and poor resource management have combined to alter the planet's natural environment in dramatic and alarming ways. For over twenty years considerable research and debate have focused on clarifying or disputing linkages between various forms of environmental change and various understandings of security. At one extreme lie sceptics who contend that the linkages are weak or even non-existent; they are simply attempts to harness the resources of the security arena to an environmental agenda. At the other extreme lie those who believe that these linkages may be the most important drivers of security in the 21st century; indeed the very future of humankind may be at stake. This book brings together contributions from a range of disciplines to present a critical and comprehensive overview of the research and debate linking environmental factors to security. It provides a framework for representing and understanding key areas of intellectual convergence and disagreement, clarifying achievements of the research as well as identifying its weaknesses and gaps. Part I explores the various ways environmental change and security have been linked and provides principal critiques of this linkage. Part II explores the linkage through analysis of key issue areas such as climate change, energy, water, food, population and development. Finally the book concludes with a discussion of the value of this subfield of security studies and with some ideas about the questions it might profitably address in the future. This volume is the first to provide a comprehensive overview of the field. With contributions from around the world it combines established and emerging scholars to offer a platform for the next wave of research and policy activity. It is invaluable for both students and practitioners interested in international relations, environment studies and human geography.

Green Security Or Militarized Environment Jyrki Käkönen, 1994 During the last years of the Cold War security was already associated with economic and environmental issues. This work discusses the different aspects of the relation between the military and the environment. The discussion is related to the changing concept of security and to peace studies.

Storming the Wall Todd Miller,2017 Fast paced frontline reportage chronicling how climate change is accelerating migration border build up and militarization in the US and beyond **The Pentagon, Climate Change, and War** Neta C. Crawford,2022-10-04 How the Pentagon became the world s largest single greenhouse gas emitter and why it s not too late to break the link between national security and fossil fuel consumption The military has for years unlike many politicians acknowledged that climate change is real creating conditions so extreme that some military officials fear future climate wars At the same time the U S Department of Defense military forces and DOD agencies is the largest single energy consumer in the United States and the world s largest institutional greenhouse gas emitter In this eye opening book Neta Crawford traces the U S military s growing consumption of energy and calls for a reconceptualization of foreign policy and military doctrine Only such a rethinking she argues will break the link between national security and fossil

fuels The Pentagon Climate Change and War shows how the US economy and military together have created a deep and long term cycle of economic growth fossil fuel use and dependency This cycle has shaped US military doctrine and over the past fifty years has driven the mission to protect access to Persian Gulf oil Crawford shows that even as the US military acknowledged and adapted to human caused climate change it resisted reporting its own greenhouse gas emissions Examining the idea of climate change as a threat multiplier in national security she argues that the United States faces more risk from climate change than from lost access to Persian Gulf oil or from most military conflicts The most effective way to cut military emissions Crawford suggests provocatively is to rethink US grand strategy which would enable the United States to reduce the size and operations of the military

Report of the Defense Science Board Task Force on Trends and Implications of Climate Change for National and International Security United States. Defense Science Board.

Task Force on Trends and Implications of Climate Change for National and International Security, 2011 Changes in climate patterns and their impact on the physical environment can create profound effects on populations in parts of the world and present new challenges to global security and stability Failure to anticipate and mitigate these changes increases the threat of more failed states with the instabilities and potential for conflict inherent in such failures This report begins with an overview of the impacts of climate change over recent decades while recognizing uncertainty about the pace of future changes It examines the political consequences of climate change as it relates to national and international security with special attention to the African continent due to the vulnerability of African nations with high potential to intersect with United States national interests Within this context the study examined the roles of the Department of Defense and the national security community writ large in responding to effects of climate change in both the United States and in key areas of the globe The deliberations of the task force identified the urgent need for clear roles and policies throughout the US government addressing the consequences of climate change and produced a set of recommendations on how the US government can manage the near term effects on populations and the longer term need for adaptation that impacts US and international security interests The recommendations include specific roles for the Department of Defense in helping both the United States and US Africa Command address these challenges The recommendations fall into five main areas The need for developing a robust climate information system Instituting water security as a core element of DOD strategy Roles of the national security community including the intelligence community the Department of State and the White House Guidance and DOD organization to address the full range of international climate change related issues and their impact on the evolution of DOD's missions Combatant command roles responsibilities and capacities The report emphasizes that the United States cannot enter into an open ended commitment to dealing with the need to address the near term consequences of climate change or the longer term need for adapting to the change The United States can provide needed expertise leadership and some level of resources where it is in the national interest to do so To be effective Department of Defense

Mushroom Clouds Simon C. Estok, Iping Liang, Shinji Iwamasa, 2021-03-28 *Mushroom Clouds Ecocritical Approaches to Militarization and the Environment in East Asia* examines the growing significance of the eco implications of the increasing militarism of East Asia. As a transcultural image and metaphor mushroom clouds signify anthropogenic violence and destruction as exemplified by wars and nuclear bombings. Immediately evoking memories of Hiroshima and Nagasaki the mushroom clouds metaphor has deep roots and implications in East Asia and this volume explores these roots and implications from the perspectives of a variety of scholars and artists from different parts of East Asia. The chapters that comprise *Mushroom Clouds* respond to the increasingly dangerous developments in the world that led up to and have occurred since the 2016 presidential election of Donald Trump. Developments that threaten the stability of the region and the world. In the wake of the 70th anniversary of the division of Korea increasing attention has been focused on the legacy of the Cold War on the one hand and on the continuing militarization of East Asia on the other. After the nuclear bombings in Hiroshima and Nagasaki after the truce across the 38th parallel after the shelling of Kinmen and Matsu East Asia became and remains one of the most densely militarized regions in the world. Under the shadow of war however the concern about environmental impacts has been growing not only in social discourse but also in literature and the visual arts. The first of its kind *Mushroom Clouds* gathers ecocritics from East Asia to examine issues such as militarization, militarized islands, military tourism, military villages, post war environments, nuclear accidents and the demilitarized zone DMZ, wildlife among others in East Asia.

Environmental Change and Security Project Report, 1995 *Implications of Climate Change for the U.S. Army* Max Brosig, Parker Frawley, Andrew Hill, Molly Jahn, Michael Marsicek, Aubrey Paris, Matthew Rose, Amar Shambaljamts, Nicole Thomas, 2019. Current conversations about climate change and its impacts are often rancorous and politically charged. As an organization that is by law non partisan the Department of Defense DoD is precariously unprepared for the national security implications of climate change induced global security challenges. This study examines the implications of climate change for the United States Army. This includes national security challenges associated with or worsened by climate change and organizational challenges arising from climate change related issues in the domestic environment. Given that the study's starting point is the implications of climate change for the U.S. Army and the Army is therefore the focus of the analysis and recommendations. That said much of the analysis involves DoD and other elements of the government and most of the Army specific recommendations have parallels that apply to other military services.

Climate Change Dilemmas for UK Defence and Security Jacopo Bellasio, 2023. Climate change is set to fundamentally shape the future of humanity. It has been recognised as a threat multiplier and a driver of instability with the potential to alter geopolitics and state behaviours as well as to aggravate political, socio-economic and environmental tensions and to foster violence and conflict. Climate change effects are expected to negatively affect the functioning of armed forces putting significant strain on the resilience of

infrastructure and capabilities exacerbating operating environment conditions and hampering military capabilities effectiveness In this context the Global Strategic Partnership GSP led by RAND Europe conducted a study exploring the implications of climate change related developments on the UK Ministry of Defence MOD s ability to deliver five priority outcomes 1 Strengthening the UK s national security by delivering threat based defence decision making 2 Protecting the UK and its Overseas Territories 3 Enhancing global security through persistent engagement and response to crises 4 Contributing to NATO s collective deterrence and defence 5 Modernising and integrating defence capabilities by taking a whole force approach and increasing the use of technology and innovation To achieve the objective of this study we developed narrative vignettes to facilitate discussion and analysis of climate change implications with stakeholders and experts in a participatory event
