Army, 2017-10-29 Training the Force Field Manual FM 25-100 FM 7-0 is the Army's capstone training doctrine and is applicable to all units at all levels and in all components. While the examples in this manual are principally focused at division and below, FM 7-0 provides the essential fundamentals for all individual leader and unit training. Training for warfighting is our number one priority in peace and in war. Warfighting readiness is derived from tactical and technical competence and confidence. Competence relates to the ability to fight our doctrine through tactical and technical execution. Confidence is the individual and collective belief that we can do all things better than the adversary and the unit possesses the trust and will to accomplish the mission. FM 7-0 provides the training and leader development methodology that forms the foundation for developing competent and confident soldiers and units that will win decisively in any environment. Training is the means to achieve tactical and technical competence for specific tasks, conditions, and standards. Leader Development is the deliberate, continuous, sequential, and progressive process based on Army values that develops soldiers and civilians into competent and confident leaders capable of decisive action. Closing the gap between training, leader development, and battlefield performance has always been the critical challenge for any army. *The United States Government Internet Manual* 2003-2004 Peggy Garvin, 2004

International Law in the Transition to Peace Carina Lamont, 2021-11-14 This book proposes a normative framework specifically designed for the complex and legally uncertain time period between armed conflicts and peace. As such, it contributes both to the furthering of a *jus post bellum* framework and to enhanced legal clarity in complex and legally uncertain environments. This in turn contributes to strengthened protection engagements and thus to improved prospects of enabling sustainable peace and security in both national and international perspectives. The book offers a novel but persuasive argument for a legal framework specific for transitional environments. Such legal framework, it is argued, is warranted in order to enable legal clarity to contemporary and outstanding legal issues as well as to furthering peace efforts in complex environments. The legal framework suggested proposes a dividing line between applicable legal frameworks that it is submitted enhances both legal clarity on protection engagements and the quest for sustainable peace. The framework proposed is founded on a legal analysis of the protective nature and function of law. It thus provides a rare but important perspective on law that is of value in the quest for sustainable peace and security. The research draws uniquely on both contemporary legal debates and on peace and conflict research. It does so in order to enable legal analysis that is both legally sound as well as appropriate and adequate in today's peace and security realities. The book provides a valuable resource for academics, researchers, and policy makers in the areas of Public International Law, International Humanitarian Law, International Human Rights Law, the law of Peace Operations, and Peace and Security Studies.
