## **Military Mountaineering:**

**U.S. Army Guide to Military Mountaineering** U.S. Department of the Army, 2014-06-10 Mountains exist in almost every country in the world and almost every war has included some type of mountain operations. This pattern will not change and soldiers will continue to fight in mountainous terrain in future conflicts. Although mountain operations have not changed, several advancements in equipment and transportation have increased the soldiers' capabilities. The helicopter now allows access to terrain that was once unreachable or could be reached only by slow, methodical climbing. Inclement weather, however, may place various restrictions on the capabilities of air assets available to a commander. The unit must then possess the necessary mountaineering skills to overcome adverse terrain to reach an objective. The U.S. Army Guide to Military Mountaineering details techniques soldiers and leaders must know to cope with mountainous terrain. These techniques are the foundation upon which the mountaineer must build. They must be applied to the various situations encountered to include river crossings, glaciers, snow-covered mountains, ice climbing, rock climbing, and urban vertical environments. The degree to which this training is applied must be varied to conform to known enemy doctrine, tactics, and actions. This guide also discusses basic and advanced techniques to include acclimatization, illness, and injury, equipment, anchors, evacuation movement on glaciers, and training.

*Military Mountaineering* Department Of The Army Headquarters, Army Training and Doctrine Command, Army Center of Maneuver E, 2012-07    *2019 Army Mountain Warfare School Curriculum Publications Combined: Basic Military Mountaineer Course & Advanced Military Mountaineer Course Summer / Winter Student Handouts* U.S. Army Mountain Warfare School, CONTENTS Basic Military Mountaineer Course Student Handout 2019 Advanced Military Mountaineer Course Summer Student Handout MAY SEP 2019 Advanced Military Mountaineer Course Winter Student Handout JAN MAR 2019 Military Mountaineer Course Knot Guide No Date Infantry Small Unit Mountain Operations February 2011 Commander's Welcome and Comments 1 Welcome to the Army Mountain Warfare School AMWS During this course you will receive some of the finest training the US Army has to offer. Our instructors are ready to pass on knowledge gained from years of experience and multiple combat deployments. While you are here our first concern is for your safety. For this reason you must be totally focused and maintain situational awareness at all times. 2 Operating in the mountains presents two distinct yet related challenges first is the severe affects that weather and the environment have on personnel and equipment and second thes ever impact the terrain has on unit mobility. How well you solve these tactical problems will directly affect your ability to take the fight to the enemy in level two and three terrain. The skills you learn here at AMWS are tools to help you and your unit solve these challenges. 3 In the mountains of Afghanistan we face an adaptive, clever enemy who uses the harsh environment to his advantage to operate against us. With specialized mountain warfare training and equipment we can use that same terrain to our advantage and seize the initiative away from the enemy. 4 Untrained and unprepared the mountain environment can be your worst enemy. Properly trained and equipped it can be your strongest ally.

We will give you the training The rest is up to you Training Mountain Warriors [U. S. Army Military Mountaineering Manual](#) U. S. Army, 2012-09-02 Mountains exist in almost every country in the world and almost every war has included some type of mountain operations This pattern will not change therefore soldiers will fight in mountainous terrain in future conflicts Although mountain operations have not changed several advancements in equipment and transportation have increased the soldiers capabilities The helicopter now allows access to terrain that was once unreachable or could be reached only by slow methodical climbing Inclement weather however may place various restrictions on the capabilities of air assets available to a commander The unit must then possess the necessary mountaineering skills to overcome adverse terrain to reach an

objective This field manual details techniques soldiers and leaders must know to cope with mountainous terrain These techniques are the foundation upon which the mountaineer must build They must be applied to the various situations encountered to include river crossings glaciers snow covered mountains ice climbing rock climbing and urban vertical environments The degree to which this training is applied must be varied to conform to known enemy doctrine tactics and actions This FM also discusses basic and advanced techniques to include acclimatization illness and injury equipment anchors evacuation movement on glaciers and training This field manual is a training aid for use by qualified personnel in conjunction with FM 3 97 6 Mountain Operations which is used for planning operations in mountainous terrain Personnel using FM 3 97 61 should attend a recognized Department of Defense Mountain Warfare School for proper training Improper use of techniques and procedures by untrained personnel may result in serious injury or death Personnel should be certified as Level I Basic Mountaineer Level II Assault Climber or Level III Mountain Leader before using FM 3 97 61 for training see Appendix A **Military Mountaineering** Department of the Army, 2002-08-26 Mountains exist in almost every country in the world and almost every war has included some type of mountain operations This pattern will not change therefore soldiers will fight in mountainous terrain in future conflicts Although mountain operations have not changed several advancements in equipment and transportation have increased the soldiers capabilities The helicopter now allows access to terrain that was once unreachable or could be reached only by slow methodical climbing Inclement weather however may place various restrictions on the capabilities of air assets available to a commander The unit must then possess the necessary mountaineering skills to overcome adverse terrain to reach an objective This field manual details techniques soldiers and leaders must know to cope with mountainous terrain These techniques are the foundation upon which the mountaineer must build They must be applied to the various situations encountered to include river crossings glaciers snow covered mountains ice climbing rock climbing and urban vertical environments The degree to which this training is applied must be varied to conform to known enemy doctrine tactics and actions This FM also discusses basic and advanced techniques to include acclimatization illness and injury equipment anchors evacuation movement on glaciers and training This field manual is a training aid for use by qualified personnel in conjunction with FM 3 97 6 Mountain Operations which is used for planning operations in mountainous terrain Personnel using FM 3 97 61 should attend a recognized Department of Defense Mountain Warfare School for proper training Improper use of techniques and procedures by untrained personnel may result in serious injury or death Personnel should be certified as Level I Basic Mountaineer Level II Assault Climber or Level III Mountain Leader before using FM 3 97 61 for training see Appendix A The measurements in this manual are stated as they are used in training either metric or standard Appendix B contains a measurement conversion chart for your convenience Commanders must consider the effects terrain and weather will have on their operations mainly on their troops and logistics efforts Weather and terrain combine to challenge efforts in moving supplies to forward areas Spring storms which may deposit a

foot of snow on dry roads combined with unprepared vehicles create hazardous situations Helicopters are a valuable asset for use in moving men and supplies but commanders should not plan to use them as the only means of movement and resupply Alternate methods must be planned due to the variability of weather Units scheduled for deployment in mountainous terrain should become selfsufficient and train under various conditions Commanders must be familiar with the restraints that the terrain can place on a unit Operations in the mountains require soldiers to be physically fit and leaders to be experienced in operations in this terrain Problems arise in moving men and transporting loads up and down steep and varied terrain in order to accomplish the mission Chances for success in this environment are greater when a leader has experience operating under the same conditions as his men Acclimatization conditioning and training are important factors in successful military mountaineering
