**Mimesis** Gregory Currie, Petr Kotátko, Martin Pokorný, 2012 The concept of mimesis has been central to philosophical aesthetics from Aristotle to Kendall Walton in plain terms it highlights the links between a fictional world or a representational practice on the one hand and the real world on the other The present collection of essays includes discussions of its general viability and pertinence and of its historical origins as well as detailed analyses of various relevant issues regarding literature film theatre images and computer games The individual papers offer new arguments for the specialist yet in their sum also provide a solid and helpful survey of the current state of the debate Contributions by P Alward G Currie D Davies L Dole el J Hamilton T Kobli ek P Kot atko A Kuzmicova J Levinson A Meskin A Pettersson M Pokorný J Robson G Rossholm R M Sainsbury F Stjernberg E Terrone K Thein A Voltolini *The Routledge Handbook of Philosophy of Imagination* Amy Kind, 2016-01-22 Imagination occupies a central place in philosophy going back to Aristotle However following a period of relative neglect there has been an explosion of interest in imagination in the past two decades as philosophers examine the role of imagination in debates about the mind and cognition aesthetics and ethics as well as epistemology science and mathematics This outstanding Handbook contains over thirty specially commissioned chapters by leading philosophers organised into six clear sections examining the most important aspects of the philosophy of imagination including Imagination in historical context Aristotle Descartes Hume Kant Husserl and Sartre What is imagination The relation between imagination and mental imagery imagination contrasted with perception memory and dreaming Imagination in aesthetics imagination and our engagement with music art and fiction the problems of fictional emotions and imaginative resistance Imagination in philosophy of mind and cognitive science imagination and creativity the self action child development and animal cognition Imagination in ethics and political philosophy including the concept of moral imagination and empathy Imagination in epistemology and philosophy of science including learning thought experiments scientific modelling and mathematics The Routledge Handbook of Philosophy of Imagination is essential reading for students and researchers in philosophy of mind and psychology aesthetics and ethics It will also be a valuable resource for those in related disciplines such as psychology and art **Aesthetics and the Sciences of Mind** Gregory Currie, Matthew Kieran, Aaron Meskin, Jon Robson, 2014 How far should philosophical accounts of the value and interpretation of art be sensitive to the scientific approaches used by psychologists sociologists and evolutionary thinkers A team of experts urge different answers to this question and explore how empirical inquiry can shed light on problems traditionally regarded as philosophical

**Kafka's Cognitive Realism** Emily Troscianko, 2014-02-03 This book uses insights from the cognitive sciences to illuminate Kafka's poetics exemplifying a paradigm for literary studies in which cognitive scientific insights are brought to bear directly on literary texts The volume shows that the concept of cognitive realism can be a critically productive framework for exploring how textual evocations of cognition correspond to or diverge from cognitive realities and how this may affect real

readers In particular it argues that Kafka's evocations of visual perception including narrative perspective and emotion can be understood as fundamentally enactive and that in this sense they are cognitively realistic These cognitively realistic qualities are likely to establish a compellingly direct connection with the reader's imagination but because they contradict folk psychological assumptions about how our minds work they may also leave the reader unsettled This is the first time a fully interdisciplinary research paradigm has been used to explore a single author's fictional works in depth opening up avenues for future research in cognitive literary science Storytelling in Opera and Musical Theater Nina

Penner, 2020-10-06 Storytelling in Opera and Musical Theater is the first systematic exploration of how sung forms of drama tell stories Through examples from opera's origins to contemporary musicals Nina Penner examines the roles of character narrators and how they differ from those in literary and cinematic works how music can orient spectators to characters points of view how being privy to characters' inner thoughts and feelings may evoke feelings of sympathy or empathy and how performers' choices affect not only who is telling the story but what story is being told Unique about Penner's approach is her engagement with current work in analytic philosophy Her study reveals not only the resources this philosophical tradition can bring to musicology but those which musicology can bring to philosophy challenging and refining accounts of narrative point of view and the work performance relationship within both disciplines She also considers practical problems singers and directors confront on a daily basis such as what to do about Wagner's Jewish caricatures and the racism of Orientalist operas More generally Penner reflects on how centuries-old works remain meaningful to contemporary audiences and have the power to attract new more diverse audiences to opera and musical theater By exploring how practitioners past and present have addressed these issues Storytelling in Opera and Musical Theater offers suggestions for how opera and musical theater can continue to entertain and enrich the lives of 21st century audiences Distributed Cognition in Classical

Antiquity Mark Sprevak, Douglas Cairns, Miranda Anderson, 2018-10-12 12 essays by international experts look at how cognition is explicitly or implicitly conceived of as distributed across brain body and world in Greek and Roman technology science medicine material culture philosophy and literary studies A range of models emerge which vary both in terms of whether cognition is just embodied or involves tools or objects in the world As many of the texts and practices discussed have influenced Western European society and culture this collection reveals the historical foundations of our theoretical and practical attempts to comprehend the distributed nature of human cognition Tense-Switching in Classical Greek Arjan A.

Nijk, 2022-02-02 Tense is at its most interesting when it behaves badly In this book Arjan Nijk investigates the variation between the past and present tenses to refer to past events in Classical Greek and beyond Adopting a cognitive approach to the issue he argues that the use of the present for preterite depends on the activation of implicit conceptual scenarios in which the gap between the past and the present is bridged The book is distinguished from previous accounts by its precision in describing these conceptual scenarios the combination of linguistic theorising with philological and statistical methods the

size of the corpus under investigation and the explicitly cross linguistic scope It provides a complete overview of the phenomenon of tense switching in Classical Greek as well as new theoretical perspectives on deixis and viewpoint and is important for classicists narratologists and linguists of every stamp This title is also available as Open Access on Cambridge Core

*Thinking in Art* Charles M. Dorn, 1994 This volume examines the way individuals think about objects and events in the world These thoughts specify a priori assumptions that indicate what will be considered beautiful valuable and good Decisions made about these matters determine what actions will be taken in regard to them The continuous change that historically characterizes art educational practices is driven by shifts in ways of thinking beliefs Curricular goals for art education must be consistent with ways of thinking The text is organized into five chapters Chapter 1 provides a brief review of 18th and 19th philosophical thought and the concepts of relations between objects and events Chapter 2 explores these

concepts as interpreted by 20th century aestheticians art historians critics and artists specifically as they concern thinking about and making art Chapter 3 examines paradigms for artistic conception Chapter 4 identifies how these paradigms now function in the art curricula of schools and chapter 5 how the paradigms relate to curriculum practice MM *Canadian Review of Comparative Literature* ,1999 **Arts & Humanities Citation Index** ,1992 **Index to Theses with Abstracts Accepted for Higher Degrees by the Universities of Great Britain and Ireland and the Council for National Academic Awards** ,1997 Theses on any subject submitted by the academic libraries in the UK and Ireland BLL ,1997 **Metaphysics, Or, the Philosophy of Consciousness, Phenomenal and Real** Henry Longueville Mansel,2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1871 edition Excerpt quid sit mente separare ea quae individuis communia sunt Necque vero utilitate sua caret nosse quomodo in cognitione intuitiva prima intellectus operatio sese exorat quoniam notionibus generum atque specierum claritas affliraditur si cognitio intuitiva cum symbolica jungatur Wolf Psychologic Empirica sec 326 individual I must by the aid of imagination supply those distinctive features which I am unable clearly to perceive To form a complete cognition of the class I must separate the common attributes from their connection with a definite time and place But how are attributes apart from their juxtaposition in space to be so connected together as to constitute a single object The head and trunk and limbs of an individual man are connected together by continuity in space and by that continuity constitute a whole of intuition whether distinctly recognized in that relation or not How are the attributes of mankind in general to be separated from their position in space and yet so united together as to constitute a whole of thought To effect this we must call in the aid of language The word is to thought what space is to perception It constitutes the connecting link between various attributes the frame as it were in which they are set and thus furnishes the means by which the features characteristic of a class may be viewed apart from the individuals in which they are intuitively perceived and combined into a complex notion or concept Conception is thus in the operations of thought the counterpart of perception in those of sense In the latter we are conscious of objects as extended i e as possessing parts related to each other by juxtaposition in space In the former we are conscious of notions as
