Mineral Economics Oded Rudawsky, 1986 The Development of the Economies of Continental Europe Alan Milward, S. Saul, S. B. Saul, 2011 This work first published in 1977 is a reissue of a trailblazing work the first textbook of economic history to deal comprehensively with the economic development of the whole continent in this period and to do so from a continental rather than a British perspective But it is more than merely a textbook it is an interpretative synthesis of the wide range of research on this subject in many countries As such it will be an indispensable guide for teachers and will extend and improve the scope of teaching by making available for the first time in English the results of continental research In addition it is a work of fundamental interest to economists in which theories and hypotheses of economic development are now examined in a much wider historical context In this way the book is an exploration of the objective validity of earlier theories and the starting point for further research into economic development and European history The work covers the continental development of the German and French economies after 1870 and then in that context analyses the development of the smaller western economies It then considers the relatively underdeveloped economies of eastern and southern Europe and includes the first attempt at a synthesis of economic development before 1914 in the Balkans It concludes with an analysis of the international economy and its relationship to the economic development of the continent **The New Economic History of the Railways (Routledge Revivals)** Patrick O'Brien, 2014-11-13 The book first published in 1977 contrasts new and older approaches to the history of transport and outlines a critical exposition of the methods used to quantify the contribution of railways to economic growth by means of counterfactual speculation and the measurement of social savings The author also outlines and appraises an alternative measure of the impact of railways namely the social rate of return on capital invested in railways The final chapters are concerned with the effects on growth generated by the construction and diffusion of railways through expenditure on labour capital goods and industrial inputs and through their effects on the integration of markets and patterns of location *Mining and Social Change (Routledge Revivals)* Martin Bulmer, 2015-06-11 The strong community ties of mining villages are the central concern of this book which deals with the social history and sociology of mining in County Durham in the twentieth century Focusing on the country as a whole this title first published in 1978 asks what is most distinctive about the area in the past and how it is changing in the present The personal documents presented in the first chapters of the book bring to life the local mining community with an evocative picture of village life at the turn of the century These first hand accounts are integrated with the results of social research carried out at Durham University over a number of years Mining and Social Change will be of interest to students of history and sociology *Sustaining Development in Mineral Economies* Richard Auty, 2002-09-26 It is widely believed that natural mineral resources are desirable However there is growing evidence that this may not always be the case Indeed it seems that natural assets can distort the economy to such a degree that the benefit actually becomes a curse In Sustaining Development

in Mineral Economies Richard Auty highlights these drawbacks and the devastating effect they can have on developing economies With reference to six ore exporters viz Peru Bolivia Chile Jamaica Zambia and Papua New Guinea he outlines how things can go badly wrong He particularly stresses the need to avoid Dutch Disease whereby competitiveness is drained out of the agriculture and manufacturing sectors so that in the long term growth falters
