

# NEW GRAD: *End-of shift Workflow*

## CHECK YOUR ORDERS

New orders can appear anytime, especially if there have been any status changes. Be sure to address and carry these out prior to shift change if possible.

## REVIEW YOUR CHARTING

Make sure your assessments have been completed, interventions have been taken care of & nursing notes have been written for each patient.

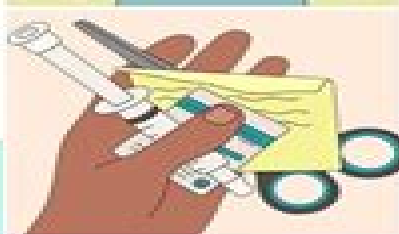

## UPDATE REPORT SHEET

Giving an organized report is crucial for a successful hand-off. What updates have happened during your shift (lab values, blood transfusions, testing, consults, etc.) ?

## "ON THE FENCE" INTERVENTIONS

Medications and interventions ordered right around the time of shift change will fall to you or the next nurse. If you have the time, ability, and it's within the timeframe, set the next shift up for success by doing these. It's really appreciated by the other nurse. Trust me.

## CHECK YOUR POCKETS

The last thing you want to leave with is a med key, medications, or papers with patient information on them. Check your pockets before heading to your car!
