**contexts of inequality** Phindile Zifikile Shangase,Daniela Gachago,Eunice Ndeto Ivala,2023-05-09 There has been a recent  
surge of interest in the concept of co teaching and co research across institutions of HE locally and globally as a response to  
limited international mobility due to COVID 19 We see co teaching and co research as teaching and research that connects  
educators and learners across different institutions and different contexts be it across South Africa Africa or the world Co  
teaching and co research is linked in this book to the term networked learning following the Networked Learning Editorial  
Collective s emphasis on relationships and collaboration rather than technology and foregrounding our strong commitment to  
social justice Our collective experiences have shown that co teaching and co research are not easy endeavours especially  
when they involve differently positioned and differently resourced contexts students and academics While these  
collaborations are enriching and exciting they need careful support preparation and time for sustained relationship building  
topics that we find are not necessarily discussed in the literature around co teaching and co research This book is an attempt  
towards closing this gap in knowledge by providing a range of chapters documenting personal experiences of academics and  
practitioners engaging in co teaching and co research across the African continent and beyond facilitated by various  
networked learning tools and technologies Framed by a spirit of sharing and connection the book provides insights into the  
benefits and challenges of such collaborations affordances of technologies to bridge unequal divides emerging practices of  
continental collaboration and beyond Additionally the book provides an unusually honest and nuanced view on co teaching  
and co research across contexts of inequalities foregrounding relationship and community building rather than technology  
and emphasising the importance of sustained connection and reflection in these collaborations Applying a wide range of

critical theoretical frameworks these evidence based but also reflective and reflexive contributions are a unique and important reminder that behind and through our screens we connect as humans who yearn to learn from each other but also need to learn how to learn from each other when we do not share the same world views
