*Smarter Balanced Preliminary Performance Levels* Northwest Evaluation Association, 2015 Recently the Smarter Balanced Assessment Consortium Smarter Balanced released a document that established initial performance levels and the associated threshold scale scores for the Smarter Balanced assessment The report included estimated percentages of students expected to perform at each of the four performance levels reported by grade and test subject e g English Language Arts or Mathematics based on preliminary field testing of the Smarter Balanced assessment conducted during the spring of 2014 These threshold scale scores and expected percentages represent a preliminary attempt at standard setting and Smarter Balanced may revise them after the spring 2015 testing term Nevertheless they represent the best information currently available about the cut scores that will be used during the spring 2015 testing term of the Smarter Balanced test Using the information provided within the Smarter Balanced report about the percentages of students expected to perform at each level Northwest Evaluation Association NWEA conducted a series of analyses to examine what Measures of Academic Progress MAP interim assessment scores might be associated with these performance level categories This was not an

empirical study in the manner of our normal scale linking studies because the Smarter Balanced assessment has not yet been fully implemented NWEA intends to work with its partner school districts to conduct such a study examining the relationship between MAP performance and Smarter Balanced performance for individual students once Smarter Balanced has been fully implemented within NWEA partner districts NWEA analyses focused on the percentages of students expected to perform within each of the Smarter Balanced performance levels NWEA compared these percentages to our own nationally representative normative distributions in order to estimate the MAP scores that would produce similar percentages of students as those expected to fall within the Smarter Balanced performance level categories The approach taken here is quite similar to the approach used in many prior linking studies and can provide highly accurate estimates of cut scores Links used in this document are contained in the appendix [Linking the New York State NYSTP Assessments to NWEA MAP Tests](#) Northwest Evaluation Association,2016 Northwest Evaluation Association NWEA is committed to providing partners with useful tools to help make inferences from the Measures of Academic Progress MAP interim assessment scores Recently NWEA completed a concordance study to connect the scales of the New York State Testing Program NYSTP reading and math with those of the MAP Reading and MAP for Mathematics assessments This report presents the 3rd through 8th grade cut scores on MAP reading and mathematics scales that correspond to the benchmarks on the NYSTP reading and math tests Information about the consistency rate of classification based on the estimated MAP cut scores is also provided along with a series of tables that predict the probability of receiving a Level 3 i e Proficient or higher performance designation on the NYSTP assessments based on the observed MAP scores taken during the same school year A detailed description of the data and analysis method used in this study is provided in the Appendix [Linking the PARCC Assessments to NWEA MAP Tests for New Mexico](#) Northwest Evaluation Association,2016 Northwest Evaluation Association NWEA is committed to providing partners with useful tools to help make inferences from the Measures of Academic Progress MAP interim assessment scores One important tool is the concordance table between MAP and state summative assessments Concordance tables have been used for decades to relate scores on different tests measuring similar but distinct constructs These tables typically derived from statistical linking procedures provide a direct link between scores on different tests and serve various purposes Aside from describing how a score on one test relates to performance on another test they can also be used to identify benchmark scores on one test corresponding to performance categories on another test or to maintain continuity of scores on a test after the test is redesigned or changed Concordance tables are helpful for educators parents administrators researchers and policy makers to evaluate and formulate academic standing and growth Recently NWEA completed a concordance study to connect the scales of the Partnership for Assessment of Readiness for College and Careers PARCC English language arts ELA and math with those of the MAP Reading and MAP for Mathematics assessments for New Mexico NM In this report presented are the 3rd through 8th grade cut scores on MAP reading and mathematics scales that correspond to the

benchmarks that Illinois adopted for its PARCC ELA and math tests Information about the consistency rate of classification based on the estimated MAP cut scores is also provided along with a series of tables that predict the probability of receiving a Level 4 i e Proficient or higher performance designation on the PARCC assessments based on the observed MAP scores taken during the same school year A detailed description of the data and analysis method used in this study is provided in the appendix

2015 NWEA Measures of Academic Progress Normative Data Northwest Evaluation Association,2015 By using carefully constructed measurement scales that span grades Measures of Academic Progress MAP interim assessments from Northwest Evaluation Association NWEA offer educators efficient and very accurate estimates of student achievement status within a subject Before achievement test scores can be useful to educators however they need to be evaluated within a context The RIT Scale is a curriculum scale that uses individual item difficulty values to estimate student achievement An advantage of the RIT scale is that it can relate the numbers on the scale directly to the difficulty of items on the tests In addition the RIT scale is an equal interval scale Equal interval means that the difference between scores is the same regardless of whether a student is at the top bottom or middle of the RIT scale and it has the same meaning regardless of grade level To that end 2015 RIT Scale Norms allow educators to compare achievement status and changes in achievement status growth between test occasions to students performance in the same grade at a comparable stage of the school year This contextualizing of student performance 1 helps teachers as they plan instruction for individual students or confer with parents 2 supports school and district administrators as they focus on allocating resources and 3 empowers school staff as they work to improve all educational outcomes The 2015 NWEA RIT Scale Norms Study provides status and growth norms for individual students as well as for schools on each of the four RIT scales Reading Language Usage Mathematics and General Science The study s results are based on K 11 grade level samples Each sample is comprised of 72 000 to 153 000 student test records from approximately 1000 schools These numbers vary by subject These samples were drawn randomly from test record pools of up to 10 2 million students attending more than 23 500 public schools spread across 6 000 districts in 49 states Rigorous procedures were used to ensure that the norms were representative of the U S school age population Since MAP assessments can be administered on a schedule designed to meet a school s needs tests can be administered at any time during the school year The 2015 norms adjust for this scheduling flexibility by accounting for instructional days allowing more valid comparisons for status and growth
