**An Apology to the Autism Community Mental Illness Stealing and Lying** Travis Breeding,2014-12-07 Over the past few years I have spent a lot of time being negative about autism This was mostly because I was experiencing an entire different set of symptoms and I could not find any autism professionals who understood that I would later find out that I had a mental illness to go along with Autism I truly believed that autism was going to kill me I thought all of the delusions hallucinations and voices were the autism telling me that I was not good enough for anyone and I would never be neurotypical In 2007 I was diagnosed with Asperger syndrome a high functioning form of autism For the first few years after that I tried to learn how to cope with autism I was doing okay with it until late 2009 or early 2010 when I started having hallucinations and delusions I just thought that it was a part of autism because I had not been diagnosed with anything officially at the time other than autism My mental illness combined with autism caused me to do some selfish things because I felt I had to do them or I was going to die An example of that would be taking money from my business and using it to pay someone to go on a date with me I struggled greatly with simple business

management issues and let a lot of people in the autism community down Because of that I wanted to write this book as an apology to the autism community for the mistakes I have made while trying to cope with mental illness I am now receiving great therapy and feeling much better mentally Autism does not seem so bad now when I am not having hallucinations or dealing with mental illness issues This book is an apology to the autism community and to parents of children with autism Some symptoms I may have talked about or reported were more likely symptoms of the mental illness I was suffering from and are not accurate symptoms of autism I do still have autism but it is much easier to cope with everything autism related when you can think clearly and are not confused because of your mental illness Autism is a beautiful thing and I am now back to enjoying my own life and living happily with autism This book will talk about the mistakes I have made and how I am working to correct them In this boo I will share how I was so desperate for friendship I was willing to steal from and lie to the people that I loved and the ones who loved me the most in order to feel companionship and intimacy Intimacy and companionship are challenging for people with autism so that part was definitely related to autism however the way in which I responded and trying to accomplish that was not The obsessive compulsive disorder the schizophrenia and all of the voices hallucinations and delusions were all a part of mental illness      *Anything You Can Do, I Can Too* Travis Breeding, 2013-10 We ve all heard of the song Anything You Can Do I can do Better This is something that I have taken with me own life and adapted it into the way I approach social interaction and things dealing with Asperger s Syndrome I believe that all children have the ability to learn feel love and connect with other children Some will be better at it than others Some people have made autism out to be this horrible thing and blown it way out of proportion The truth is autism is no different than anything else in life For example look at two people who play basketball Let s compare Michael Jordan to myself in that regard I played basketball in elementary school and now I shoot hoops for fun every now and then MJ is a professional and played for the Chicago Bulls Michael Jordan is the greatest player to ever play in the National Basketball Association If he and I were to play one on one I would most certainly lose My conclusion is Michael Jordan is a better basketball player than I am I m okay with that Believe it or not there are some things that I could be better at than he is This is no different than comparing a neurotypical child to a child on the autism spectrum While one might excel and have great social skills the other might go onto become an engineer or invent something useful to society While we all alike in some ways we are also different in many other ways You have to remember no matter what that we are all unique We all have something to contribute to this world That s the beauty of life When you put all of us together we have a great variety of people with different likes and interest If everyone all liked the same thing there wouldn t be enough of it to go around for all of us Always remember some people are going to be better at something than you are but you are also better at something than they are Have this attitude about life in general especially about autism There are many things that you will learn from your child if you are patient and allow them to teach and communicate to you Something important that I ve learned in my journey of studying autism spectrum disorders

is that are kids will comply with a request They will most often do what we ask It might not be on our time table as it may take them longer Children with autism will comply with a request if given the chance It may take them longer than other children and we just have to remember to be patient Stop take that extra minute out of your busy agenda for that day and allow the child to show you he or she can listen and comply with request What a lot of people don t realize is that everyone has some social awkwardness in their lifetime We are not perfect It s natural to mess up every now and then I want you to remember this next phrase every time you as a parent are having a rough day or are discouraged with the frustrations of autism Everyone experiences symptoms of autism People have anxiety every day People also have Obsessive Compulsive disorder These are quite normal things in our society Other people s children go through some of the same things that your child is Your child just experiences each thing on a more intense level Your child also might have a combination of those symptoms that go together to make what we know as autism spectrum disorders So remember everyone has aspzie moments all throughout their life You are not alone and with over 750 000 children in the United States alone with an autism spectrum diagnosis you have plenty of support **International Who's who** ,1995 *Forthcoming Books* Rose Arny,1998-06

**Cumulative Author Index to Psychological Abstracts** ,1975 Obsessions That Kill You Travis E.

Breeding,2016-05-02 Travis shares how obsessions took over his life after high school People with autism tend to fixate on something and become more obsessed than normal with it and this causes them a lot of self destruction in other areas of their lives Sometimes people with autism develop a special interest in something and a special interest can sometimes be unhealthy for people with autism that fixate often While people with autism are more likely to obsess over things than others it does not mean that every single obsession is a bad thing or is something destructive Some obsessions and fixations are good like for Travis his obsession in middle and high school was playing the trombone in the band and jazz band He became really good at playing the trombone because his obsession caused him to fixate on it and really learn how to play it Then there are the unhealthy obsessions that come along with hearing voices and having hallucinations They are girls and breasts for Travis As an adult that is all he can think about and it has gotten so bad that he is unable to even begin to function in

other areas of his life Every time Travis gets a job he fails at it and ends up quitting because he does not know how to talk to women Travis adult obsessions are not healthy for him or others around him Travis s adult obsession caused him to lose his trombone and music career because he could not even focus on playing the trombone anymore due to constantly obsessing over women and their breasts This book will show you how quickly obsessions can destroy someone s life and make it hard for them to function In a way you might say that these obsessions can kill a person or at least take the life away from the person we knew before the obsessions and voices started This is a great book for people wanting to learn more about autism fixations and special interests and obsessions in general Here is an excerpt from the book For me the obsessions I think are a combination of two things I think the first thing going on is that I am very obsessed and fixate on things That happens naturally for me and it makes it very hard for me to focus on other areas of life when I am stuck on this one thing trying to learn and figure it out I have been stuck on women and their breasts for many years now since I was 21 years old I have been trying to figure out how to have a romantic relationship with a woman Because of my fixation I put so much time and energy into building a relationship with a woman that I forget about other areas of my life and other areas of my life tend to fall apart because of my obsession

**Making My First Friend** Travis Breeding, 2013-08-21 This is a social story about how I made my first friend I will give examples from my childhood as I made friends with Eric I met Eric in Kindergarten I didn t know anyone and had no idea how to make friends This book gives you ideas for helping your child learn how to make friends This is great for working with children one on one or in groups The best way to make a friend is to be you Chapter Titles 1 I Am An Aspie Chapter 1 explains what it s like to live with Asperger s Syndrome You ll get some ideas on what life is like and how my mind works differently but not less than yours 2 Connect With Us In chapter 2 you will learn about my make believe world I will give you some tips on coming into your child s make believe world to connect with them 3 My First Friend In chapter 3 you will meet my very first friend Eric Learn how I made friends with Eric I give some tips on helping your child make new friends Learn how I reacted when I found out my first friend was moving away 4 My Special Interest In Friendship Sometimes people with Autism develop special interest in objects or things In some cases they develop a special interest in making friends This chapter gives you an in depth look at how the special interest comes into play when making friends 5 Are You My Friend Or Are You A Bully Chapter 5 gives some tips on how to help your child determine if the friends they interact with are really true friends or if they are bullies taking advantage of them 6 One Dimensional Mind Chapter 6 talks about how the autism mind can be one dimensional meaning we tend to have intense focus on one area or subject and sometimes have a difficult time focusing on multiple things at once 7 Escape Into Imagination Related to the make believe world Escaping into Imagination is a great coping tool for me Learn how it helps me get through some difficult days It can also be a place where I get lost and have a difficult time with reality 8 Obsessions Or Special Interests A special interest is not Obsessive Compulsive Disorder It may appear to be an obsession but it is not related to OCD 9 Social Thinking and Context In

chapter 9 you will learn more about social skills Social thinking and context are related to social skills They are how we apply the social skills that we learn Learn how I use social thinking and context to make friends Excerpt Kindergarten was a rough time But I recall my first friendship with a kid named Eric At that young of age I can t tell you how the friendship began or developed It naturally happened When we are children at that age there are a lot less social norms and rules to making a friend and keeping a friend Things happen naturally I remember running around on the playground with Eric and some of his friends playing games like Cowboys and Indians These things took little to no effort for me It was a natural situation in which I was able to just be in the moment and develop a natural friendship with Eric

*Sexual Obsessions in Obsessive-Compulsive Disorder* Monnica T. Williams, Chad T. Wetterneck, 2019-07-09 Many people suffer in secret from unwanted sexual obsessions These people are not perverts or pedophiles but normal individuals with a brain based condition called obsessive compulsive disorder or OCD Most of us have heard of OCD but few realize that OCD can cause people to have terrifying sexual thoughts that just won t go away Many therapists are baffled by these symptoms and may spin their wheels trying to get to the root of problem The good news is that there are effective short term treatments to help sufferers overcome these demons and start feeling better again
