**Handbook of Historical Studies in Education** Tanya Fitzgerald, 2020-04-03 This book offers an in depth historiographical and comparative analysis of prominent theoretical and methodological debates in the field. Across each of the sections contributors will draw on specific case studies to illustrate the origins, debates and tensions in the field and overview new trends, directions and developments. Each section includes an introduction that provides an overview of the theme and the overall emphasis within the section. In addition, each section has a concluding chapter that offers a critical and comparative analysis of the national case studies presented. As a Handbook, the emphasis is on deeper consideration of key issues rather than a more superficial and broader sweep. The book offers researchers, postgraduate and higher degree students, as well as those teaching in this field, a definitive text that identifies and debates key historiographical and methodological issues. The intent is to encourage comparative historiographical perspectives of the nominated issues that overview the main theoretical and methodological debates and to propose new directions for the field.

**Pedagogies of Educational Transitions** Nadine Ballam, Bob Perry, Anders Garpelin, 2016-10-04 This book presents the latest research on educational transitions from a variety of research traditions and practical contexts set in Australia, New Zealand and several European countries. It examines critically questions and reshapes ideas and notions about children's transitions to school. The book is divided into five parts, the first two of which emphasise diversity and inclusion, with Part II focusing solely on the transition to school for children from Indigenous cultures. Part III explores the notion of continuity, which has been widely debated in terms of its role in the transition to school. Part IV explores the transition to school through the notion of crossing borders. The final section of this book, Part V, includes ideas about future directions for work in the area of educational transitions and presents the notion of transitions as a tool for change to policy research and practice. The book concludes with a critical synthesis of the research outlined throughout, including recommendations regarding future research related to educational transitions.
