

CONJURING PROPERTY

JEREMY M. CAMPBELL

The background of the book cover is a solid mustard yellow. A large, irregular shape, resembling a piece of torn paper, is cut out from the upper half of the cover. This reveals a photograph of a landscape where a forest fire is taking place. In the foreground, there is a dense, dark green forest. In the background, a line of trees is being consumed by bright orange and yellow flames. The sky above the fire is a pale, hazy blue. The overall composition suggests a theme of environmental destruction and its impact on property.

Pdf Conjuring Property Speculation Environmental Brazilian:

Fixing the Climate Charles F. Sabel, David G. Victor, 2024-04-02 Can the world stop climate change The prognosis is bleak Most efforts to tackle the problem have focused on treaties that require virtually global consensus yet meaningful consensus has been elusive because deep cuts in emissions are expensive and antagonize well organized interests Predictably diplomacy has swung between gridlock and superficial agreements with little impact After three decades of sustained negotiations on global warming emissions have risen by one third Stopping climate warming requires that they be cut essentially to zero Sabel and Victor look to offer a case for optimism by proposing a different strategy to recast climate change as a problem best addressed piecemeal Rather than seeking a grand global bargain they argue that the problem should be broken down into local challenges They call this concept experimentalist governance massive simultaneous searches for local solutions that are scalable to the global level with a focus not on marginal incentives for success but on penalties for repeated egregious failure The authors show through a series of cases how regulators firms farms and NGOs faced with penalty defaults are learning to solve some of the knottiest environmental problems they then propose central mechanisms that could help monitor and review progress establishing which experiments are working and establish new frontiers for experimentation While the threat of impending catastrophe has understandably made debate about climate policy increasingly shrill and polarized Sabel and Victor offer here a guide to institutional design that could finally lead to the politically and economically self sustaining reductions in emissions that thirty years of global diplomacy has not delivered

The Carbon Calculation Raquel Rodrigues Machaqueiro, 2023-03-07 Examines how climate science the policy world and neoliberalism have mutually informed and co constituted each other in order to define the problem of climate change as one of market failure a diagnosis that implicitly restricts the imaginable solutions and concomitant policy debates to ones about how to adjust improve or otherwise rationalize the market This book traces the history through which politics and science have intertwined and informed each other in order to confine debates about how to tackle climate change in ways that pre empt any possibilities other than market based solutions In tracing the emergence of a conceptual apparatus that has come to operationalize greenhouse gases in terms of a singular and simplified unit carbon that can be commodified and a logic that enables transaction of this unit on a global scale this study offers insights into evolving novel forms of transnational governance and rationale for markets as governing tools

Caro, 2021-01-23 In 2020 the world is in the throes of the COVID 19 global pandemic an epidemic the likes of which humankind has not experienced for decades This book speaks to common and fundamental underlying issues that national communities face from a humanitarian and planetary systems perspective From the globalization initiatives of the last decades a dynamic and interconnected new planetary system order is emerging This book underscores the need for decent ethical healthy and just societies that enable individuals to reach full human potential It explores the future directions of 12

Key Strategic Influencer KSI nations through 18 systemic factors that will shape the contours of future planetary governance this century Finally it proposes a nonconventional systems paradigm to humanitarian challenges **Masters of the Lost Land** Heriberto Araujo, 2023-01-19 Powerful Financial Times More twists and turns than a Hollywood spy thriller Spectator A story we all need to hear New Statesman Gripping Araujo's accretion of detail has a powerful effect New York Times Excellent Kirkus Reviews Deep in the heart of the Amazon an entire region has lived under the control of one notorious land baron Jos lio de Barros Jos lio cut a grisly path to success having arrived in the jungle with a shady past he quickly made a name for himself as an invincible thug who grabbed massive tracts of public land burned down the jungle and executed or enslaved anyone trying to stop him Enter Dezinho the leader of a small but robust farm workers union fighting against land grabs ecological destruction and blatant human rights abuses When Dezinho was killed in a shocking assassination the local community held its breath Would Jos lio whom everyone knew had ordered the hit finally be brought to account Or would authorities look the other way as they had hundreds of times before Dezinho's widow Dona Joelma was not about to let that happen After his murder she stepped into the spotlight orchestrating a huge push to bring national media attention to the injustices in the Amazon Set against the backdrop of Bolsonaro's devastating cuts to environmental protections Brazil's rapidly changing place in the geopolitical spectrum and the Amazon's crucial role in climate change Masters of the Lost Land is both a gripping epic into one of the last wild places on Earth and an urgent illustration of how people are fighting for and winning justice for their futures and the environment Frontiers of Development in the Amazon Antonio Augusto Rossotto Ioris, Rafael R. Ioris, Sergei V. Shubin, 2020-06-22 Frontiers of Development in the Amazon Riches Risks and Resistances contributes to ongoing debates on the processes of change in the Amazon a region inherently tied to the expansion of internal and external socio economic and environmental frontiers This book offers interdisciplinary analyses from a range of scholars in Europe Latin America and the United States that question the methods of development and the range of socio ecological impacts of those methods by examining the theoretical methodological and empirical dimensions of frontier making along with evaluating and refining existing frameworks Contributors focus on the complex politics of border formation shaped by institutional economic and political forces placing them in relation to ethical imaginary and symbolic elements In doing so contributors explore the dynamic production of identities values and subjectivities covering matters of migratory patterns complex power struggles and intensive at times violent clashes Among other topics this book assesses the recent encroachment of export driven agribusiness into the Amazon Region in the context of recolonization resource exploitation and multiple programs of modernization and national integration Scholars of Latin American studies international development environmental studies and applied social sciences will find this book particularly useful
