Governance of Communication Networks Brigitte Preissl, Jürgen Müller, 2007-01-30 Few would doubt the potential of information technology to connect individuals firms and organisations Whether this will actually lead to the integration of markets and societies is a different issue The articles collected in this book shed light on crucial considerations for the success of global communication networks These include frameworks for regulation inclusion of customers in defining product and service strategies access to advanced technology and networks for all groups and more

Access Pricing in Telecommunications OECD, 2004-01-30 This report addresses the regulation of access to telecommunication networks Development of competition and the success of liberalisation often depend on the access terms and conditions chosen and public policy interest in getting these terms and conditions right is important

The Economics of Antitrust and Regulation in Telecommunications Pierre A. Buigues, Patrick Rey, 2004-01-01 Contributing to a convergence of legal and economic approaches The Economics of Antitrust and Regulation in Telecommunications integrates economic theory into current EU antitrust policy within the sector The book addresses the role of competition and regulatory policies on a number of key issues in telecommunications such as market definition collective dominance access to networks and allocation of scarce resources

Competition and Investment in Telecommunications and Media Markets Roberto Balmer, 2014-01-20 This book reviews the economic literature on cooperative investment in next generation broadband networks and geographic regulation It additionally proposes innovative models for estimating the level of competition and investment in the fixed telephony market and the retail market for newspapers In doing so it addresses two hotly debated issues in business strategy and economic policy the determinants of investment and competition and the impacts of innovative investment schemes The first chapter reviews the literature on new cooperative investment schemes in next generation broadband networks and geographic regulation The effects on competition investment and welfare of such schemes crucially depend on the details of the agreements For instance in the case of joint ventures the manner in which investment costs are shared and internal and external access prices are determined significantly impacts the outcome In the case of long term access agreements it is essential to consider how access tariffs are structured whether they can adapt to market developments ex post and whether contracts are signed before or after the investment takes place Generally many of these agreements allow for some extent of risk sharing offering the possibility of increasing investment incentives when firms are not risk neutral It is suggested that regulators consider introducing regulated co investment agreements complementing current regulation in addition to considering geographically segmented access prices The second chapter assesses entry and competition in local retail markets for newspapers It builds on the new empirical industrial organisation NEIO literature to estimate sustainable coverage and competitive effects of entry for Swiss newspaper sellers which sell composite goods newspapers food and other goods of daily use An entry threshold ratio methodology is used allowing for model estimation

even when the range of products under examination is not exactly defined and when price and quantity data are not available. It is found that under duopoly prices the market size of a Commune required for single firm entry is about twice as large as under monopoly prices. A clear and quantifiable trade off between competition and investment therefore exists. Moreover it is found that while a second entrant in this market strongly increases competition further entry doesn't have a significant additional competitive effect. From a welfare perspective therefore it can be stated that two is enough to ensure competition in this market. In the third chapter competition and market strategies in the Swiss fixed telephony market are assessed. A market model based on a generalised version of the traditional dominant firm competitive fringe model is developed. Direct estimation of the incumbent's intertemporal residual demand function is performed by instrumenting the market price with incumbent specific cost shifting variables as well as other variables. The concrete estimates show that residual retail demand for voice traffic is highly inelastic. Such a level of elasticity is only compatible with a profit maximising incumbent in the case of largely competitive conduct. It is therefore found that the Swiss incumbent acted largely competitively and that current regulated telephony retail price caps could not be justified on the basis of a lack of competition.

Handbook of Research on Overcoming Digital Divides: Constructing an Equitable and Competitive Information Society Ferro, Enrico, Dwivedi, Yogesh K., Gil-Garcia, J. Ramon, Williams, Michael D., 2009-09-30. This book presents a comprehensive integrative and global view of what has been called the digital divide. Provided by publisher. [Handbook on the Economics of the Internet](#) Johannes M. Bauer, Michael Latzer, 2016-05-27. The Internet is connecting an increasing number of individuals, organizations and devices into global networks of information flows. It is accelerating the dynamics of innovation in the digital economy, affecting the nature and intensity of competition and enabling private companies, governments and the non-profit sector to develop new business models. In this new ecosystem many of the theoretical assumptions and historical observations upon which economics rests are altered and need critical reassessment. [Access Pricing in Telecommunications](#) Organisation for Economic Co-operation and Development, 2004. The development of competition and the success of liberalisation measures within public utility industries often depends on access terms and conditions. Prepared by the OECD's Competition Committee, this report focuses on the regulation of access to essential facilities within the telecommunications industry, drawing on theory and practice of access pricing to help regulators and policy makers learn from OECD experiences to achieve efficient and competitive outcomes. *Communications & Strategies*, 2008. **Media Diversity and Localism** Philip M. Telecom Tensions Mike Zajko, 2021-05-15 Today's internet service providers mediate communication control data flow and influence everyday online interactions In other words they have become ideal agents of public policy and instruments of governance In Telecom Tensions Mike Zajko considers the tensions inherent to this role between private profits and the public good competition and cooperation neutrality and discrimination surveillance and security and asks what consequences arise from them Many understand the internet as a technology that cuts out traditional gatekeepers but as the importance of

internet access has grown the intermediaries connecting us to it have come to play an increasingly vital role in our lives Zajko shows how the individuals and organizations that keep these networks running must satisfy a growing number of public policy objectives and contradictory expectations Analyzing conflicts in Canadian policy since the commercialization of the internet in the 1990s this book unearths the roots of contemporary debates by foregrounding the central role of internet service providers From downtown data centres to publicly funded rural networks Telecom Tensions explores the material infrastructure power relations and political aspirations at play Theoretically informed but grounded in the material realities of people and places Telecom Tensions is a fresh look at the political economy of telecommunications in Canada updating conversations about liberalization and public access with contemporary debates over privacy copyright network neutrality and cyber security **Trade, Investment and Competition Policies in the Global Economy** Paolo Guerrieri, 2002
