**Media & Entertainment Law 2/e** Ursula Smartt, 2014-03-21 Media and Entertainment Law presents a contemporary analysis of the law relating to the media and entertainment industry both in terms of its practical application and its theoretical framework. It provides a clear, current and comprehensive account of this exciting subject. Fully updated and revised, this second edition is one of the first texts to contain a full analysis of the Leveson Inquiry and the implications for our press and media that are arising from it. The new edition contains a new chapter analysing the Defamation Act 2013, the Digital Economy Act 2010 which aimed to toughen up against copyright infringement online and has been subject to parliamentary review since coming into power, and the liability of internet service providers including recent cases such as Tamiz vs Google 2012 which goes some way to define the extent to which an ISP may or may not be found liable for their bloggers' content. With integrated coverage of Scots and Northern Irish law, Media and Entertainment Law also highlights comparisons with similar overseas jurisdictions such as with the liability of ISPs where there are differences in both US and European law in order to help students demonstrate an awareness of media laws which may then influence UK legislation. Looking at key aspects such as TV and radio broadcasting, the print press, the music industry, online news and entertainment and social networking sites, this text provides detailed coverage of the key principles, cases and legislation as well as a critical analysis of regulatory bodies such as OFCOM and the new regulator for the UK's newspapers and magazines and online editions, the Independent Press Standards Organisation (IPSO). The text also provides the most comprehensive and up to date coverage of the law relating to Intellectual Property law for the entertainment industry with recent changes in EU law relating to performers' rights. **Media & Entertainment Law** Ursula Smartt, 2017-02-03 Media Entertainment Law presents a contemporary analysis of the law relating to the media and entertainment industries both in terms of its practical application and its theoretical framework, providing a broad and comprehensive coverage of these fast changing branches of the law. Fully restructured to complement how media law is taught today in the digital age, this third edition explores recent updates in the law including the outcomes of the Google Spain case and the right to be forgotten, the use of drones in breach of privacy laws, internet libel and the boundaries of media freedom and press regulation following the Leveson inquiry. Media Entertainment Law uses the most up to date authorities to explore privacy and confidentiality subjects such as the Prince Charles black spider letters, the Maximilian Schrems and the celebrity superjunction (PJS v Newsgroup Newspapers) cases. The book also covers defamation, contempt of court and freedom of information plus Scots law. New to this edition: A brand new chapter is dedicated to exploring technology and the media including contemporary issues such as the dark web, the surveillance state, internet censorship and the law and social media including bloggers, vloggers and tweeters. The chapters on regulatory authorities have been expanded to provide greater clarification and explanation of broadcasting, press and advertising regulation.

Guimarães,2019-06-05 The rise and spread of the Internet has accelerated the global flows of money technology and information that are increasingly perceived as a challenge to the traditional regulatory powers of nation states and the effectiveness of their constitutions The acceleration of these flows poses new legal and political problems to their regulation and control as shown by recent conflicts between Google and the European Union EU This book investigates the transnational constitutional dimension of recent conflicts between Google and the EU in the areas of competition taxation and human rights More than a simple case study it explores how the new conflicts originating from the worldwide expansion of the Internet economy are being dealt with by the institutional mechanisms available at the European level The analysis of these conflicts exposes the tensions and contradictions between on the one hand legal and political systems that are limited by territory and on the other hand the inherently global functioning of the Internet The EU's promising initiatives to extend

the protection of privacy in cyberspace set the stage for a broader dialogue on constitutional problems related to the enforcement of fundamental rights and the legitimate exercise of power that are common to different legal orders of world society Nevertheless the different ways of dealing with the competition and fiscal aspects of the conflicts with Google also indicate the same limits that are generally attributed to the very project of European integration showing that the constitutionalization of the economy tends to outpace the constitutionalization of politics Providing a detailed account of the unfolding of these conflicts and their wider consequences to the future of the Internet this book will appeal to scholars working in EU law international law and constitutional law as well as those in the fields of political science and sociology
