development of national regional and topical historiographies from the Ancient Near East to the history of sexuality In addition to the Western tradition it includes substantial assessments of African Asian and Latin American historians and debates on gender and subaltern studies *Medieval Germany, Research and Resources* John Eldevik,2006 **Medieval Germany, 1056 - 1273** Alfred Haverkamp,1990 Count and Bishop in Medieval Germany Benjamin Arnold,1991 In this examination of the functions of lordship in a medieval society Benjamin Arnold seeks answers to some of the most fundamental questions for the period of political and institutional history How did the lords maintain control over the people land and resources How was their rule sustained and justified Arnold chooses to analyze the Eichst tt region an area on the borders of three major German provinces Bavaria Franconia and Swabia The region was the geographical and political dimension within which succeeding bishops with great tenacity and inventiveness survived the threat of dominion by their secular neighbors the counts The bishops of Eichst tt were able to emerge with a durable territorial structure of their own which they succeeded in recasting between 1280 and 1320 into a credible and long lasting principality Modern ideas of political progress Arnold contends tend to be unfair to medieval institutions that have not left easily recognizable descendants He argues that it would be more prudent to observe in the territorial fragmentation of Germany not the triumph of chaos but the outcome of a reasonably orderly social and legal process that provided alternative institutions to those of a centralized or national monarchy **Debating medieval Europe** Stephen Mossman,2025-06-24 Debating medieval Europe serves as an entry point for studying and teaching medieval history Rather than simply presenting foundational knowledge or introducing sources it provides the reader with frameworks for understanding the distinctive historiography of the period digging beneath the historical accounts provided by other textbooks to expose the contested foundations of apparently settled narratives This second volume addresses the central and later Middle Ages covering the period c 1050 c 1450 The chapters cover such topics as the papacy the Empire and the German lands the British Isles the Crusades and the Latin East and incorporates the very latest epidemiological research in its presentation of the Black Death It features a highly distinguished selection of medieval historians including Graham Loud Amy Livingstone and Len Scales **Europe in the High Middle Ages, 1150-1309** John Hine Mundy,1991 Provides a portrait of the social economic political and intellectual life in Latin Christendom from the tenth through twelfth centuries **Defenders of the Holy Land** Jonathan P. Phillips,1996 The triumph of the First Crusade 1095 1099 led to the establishment of a Latin Christian community in the Levant Remarkably despite growing pressure from the neighbouring Muslim powers and the failure of the Second Crusade 1145 49 the settlers were able to occupy Jerusalem and substantial areas of what are now Israel Syria and the Lebanon for over three quarters of a century It was the fall of Jerusalem to Saladin in 1187 which precipitated the famous Third Crusade dominated by Richard the Lionheart This is the first systematic investigation of the settlers attempts to seek support for their vital role as guardians of the Holy Land Jonathan Phillips draws together a disparate range of evidence to show how they

turned to western Europe and to a lesser extent Byzantium for help As attitudes and strategies evolved the settlers approach became increasingly sophisticated peaking during the reign of King Amalric of Jerusalem 1163 1174 when diplomatic activity was particularly intense The author also investigates the attitude of King Henry II of England towards the crusades and the effects of the Becket dispute on western responses to the needs of the Holy Land In this fascinating and original study Jonathan Phillips demonstrates that contact between the Latin East and the West was far more complex than previously believed and exposes for the first time the range and scale of the settlers efforts to maintain Christian control of the Holy Land
