Picturebooks Sandra L. Beckett,2013-06-17 This book situates the picturebook genre within the widespread international phenomenon of crossover literature examining an international corpus of picturebooks including artists' books wordless picturebooks and celebrity picturebooks that appeal to readers of all ages Focusing on contemporary picturebooks Sandra Beckett shows that the picturebook has traditionally been seen as a children's genre but in the eyes of many authors illustrators and publishers it is a narrative form that can address any and all age groups Innovative graphics and formats as

well as the creative often complex dialogue between text and image provide multiple levels of meaning and invite readers of all ages to consider texts that are primarily marketed as children's books. The interplay of text and image that distinguishes the picturebook from other forms of fiction and makes it a unique art form also makes it the ultimate crossover genre. Crossover picturebooks are often very complex texts that are challenging for adults as well as children. Many are characterized by difficult adult themes, genre blending, metafictional discourse, intertextuality, sophisticated graphics, and complex text-image interplay. Exciting experiments with new formats and techniques as well as novel interactions with new media and technologies have made the picturebook one of the most vibrant and innovative contemporary literary genres, one that seems to know no boundaries. Crossover Picturebooks is a valuable addition to the study of a genre that is gaining increasing recognition and appreciation and contributes significantly to the field of children's literature as a whole. **Art Now Gallery Guide**, 2005

Innovative Practices in Creative Writing Teaching Graeme Harper, 2022-12-08. Associated with creativity, originality, newness, and invention, innovation is a frequent component of creative writing. However, how, where, and when does innovation occur in creative writing teaching? The writing arts combine common, established aspects of communicating through the written word with elements of originality that extend or challenge how written language is used. Different forms, genres, and styles of creative writing stay close to or move further away from the writing mainstream. What about creative writing teaching: are there different levels or types of innovation? Exploring such innovation, this volume gathers together contributors whose teaching stories provide direction, stimulus, and much encouragement for those seeking to innovate in how creative writing is taught and therefore ultimately how it is learnt. **New Directions in Picturebook Research** Teresa Colomer, Bettina Kümmerling-Meibauer, Cecilia Silva-Díaz, 2010-07-12. In this new collection, children's literature scholars from twelve different countries contribute to the ongoing debate on the importance of picturebook research focusing on aesthetic and cognitive aspects of picture books. Contributors take interdisciplinary approaches that integrate different disciplines such as literary studies, art history, linguistics, narratology, cognitive psychology, sociology, memory studies, and picture theory. Topics discussed include intervisuality, twist endings, autobiographical narration, and metaliterary awareness in picturebooks. The essays also examine the narrative challenges of first-person narratives, ellipsis, and frame-breaking in order to consider the importance of mindscape as a new paradigm in picturebook research. Tying picturebook studies to studies in childhood, multimodality, and literacy, this anthology is a representative of the different opportunities for research in this emerging field. **The New York Times Index**, 1995
