The Media of Secular Music in the Medieval and Early Modern Period (1100-1650) Vincenzo Borghetti, Alexandros Maria Hatzikiriakos, 2024-05-09 This book brings a new perspective to secular music sources from the Middle Ages and early modernity by viewing them as media communication tools whose particular features shape the meaning of their contents Ranging from the eleventh to seventeenth centuries and across countries and genres the chapters offer innovative insights into the historical relationship between music and its presentation in a wide variety of media The lens of media enables contributors to expand music history beyond notated music manuscripts and instruments to include images furniture luxury items and other objects and to address uniquely visual and material aspects of music sources in books and literature Drawing together an international group of contributors the volume pays close attention to the medial and material dimensions of musical sources considering them as multifaceted objects that not only contain but also determine the nature of the music they transmit Transforming our understanding of musical media this volume will be of interest to scholars of musicology art history and medieval and early modern cultures

[Music in the Collective Experience in Sixteenth-Century Milan](#) Christine Suzanne Getz, 2023-05-31 Renaissance music like its sister arts was most often experienced collectively While it was possible to read Renaissance polyphony silently from a music manuscript or print improvise alone or perform as a soloist the very practical nature of Renaissance music defied individualism The reading and improvisation of polyphony was most frequently achieved through close co operation and this mutual endeavour extended beyond the musicians to include the society to which it is addressed In sixteenth century Milan music an art traditionally associated with the court and cathedral came to be appropriated by the old nobility and the new aristocracy alike as a means of demonstrating social primacy and newly acquired wealth As class mobility assumed greater significance in Milan and the size of the city expanded beyond its Medieval borders music making became ever more closely associated with public life

With its novel structures and diverse urban spaces sixteenth century Milan offered an unlimited variety of public performance arenas The city s political and ecclesiastical authorities staged grand processions church services entertainments and entries aimed at the propagation of both church and state Yet the private citizen utilized such displays as well creating his own miniature spectacle in a visual and an aural imitation of the ecclesiastical and political panoply of the age Using archival documents music prints manuscripts and contemporary writing Getz examines the musical culture of sixteenth century Milan via its life within the city s most influential social institutions to show how fifteenth century courtly traditions were adapted to the public arena The book considers the relationship of the primary cappella musicale including those of the Duomo the court of Milan Santa Maria della Scala and Santa Maria presso San Celso to the sixteenth century institutions that housed them In addition the book investigates the musician s role as an actor and a functionary in the political religious and social spectacles produced by the Milanese church state and aristocracy within the city s diverse urban spaces Furthermore it establishes a context for the numerous motets madrigals and lute intabulations composed and printed in sixteenth century Milan by examining their function within the urban milieu in which they were first performed Finally it musically documents Milan s transformation from a ducal state dominated by provincial traditions into a mercantile centre of international acclaim Such an important study in Italian Renaissance music will therefore appeal to anyone interested in the culture of Renaissance Italy

Exposición de obras maestras, siglos XII al XVII, 1951 Exposición de arte gótico Paula de Koenigsberg, 1947 *Intacta María* Pablo González Tornel, 2017 The exhibition analyses the process through which devotion to the Immaculate conception was created and popularised in early modern Spain While the Immaculate Conception only became dogma in 1854 as early as 1616 the Spanish Monarchy became a staunch supporter of the theory turning its defence into a national priority In the following years the Immaculate Conception became Spain s most heartfelt devotion and a sign of national identity Art played an important role in this process amounting to what we may describe as a marketing campaign This will be the focus of the Museo de Bellas Artes forthcoming exhibition featuring more than 50 paintings sculptures prints and books borrowed from notable Spanish museums and churches such as the Museo Nacional de Escultura de Valladolid the Cathedral of Seville the Biblioteca Nacional de España and many others Sacred Choral Music in Print Gary S.
