### **Building Your Own Computer Made Easy**

James Bernstein, 2019 Everyone has to get a new computer at some time or another so why not get the computer you always wanted. Sure you can buy a nice computer off of the store shelf but you never really get exactly what you want that way. When you build your own computer you are in charge of what components are going to be used so you know that it will perform the way you want it to. The goal of this book is to help you choose the parts components for your new computer so you can end up with a computer that does what you want it to do. Then you will be taken through the build process with step by step instructions and illustrations making it easy to get your new computer up and running in no time. Finally you will be guided through the process of installing an operating system on your computer so you can start enjoying your work. The chapters in the book cover the following topics: Chapter 1 Why Build Your Own Computer Chapter 2 Choosing Components Chapter 3 Planning Your Build Chapter 4 Putting the Pieces Together Chapter 5 Initial Power Up Chapter 6 Installing Your Operating System. About the Author James Bernstein has been working with various companies in the IT field since 2000 managing technologies such as SAN and NAS storage VMware backups Windows Servers Active Directory DNS DHCP Networking Microsoft Office Exchange and more. He has obtained certifications from Microsoft VMware CompTIA ShoreTel and SNIA and continues to strive to learn new technologies to further his knowledge on a variety of subjects.
