

# INTERMITTENT FASTING

A type of scheduled eating plan where you simply restrict your normal daily eating to a 6-8 hour window of time, without cutting calories.\*

## BENEFITS

### INCREASES

- ◆ Insulin and leptin sensitivity, reducing the risk of chronic disease, from diabetes to heart disease and even cancer
- ◆ Ghrelin levels, also known as "the hunger hormone," to reduce overeating
- ◆ Ability to become "Fat Adapted", which increases your energy by burning stored fat

### DECREASES

- ◆ Triglyceride levels, decreasing your risk of heart disease
- ◆ Inflammation and free radical damage
- ◆ Weight gain and metabolic disease risk

\*If you're hypoglycemic, diabetic, or pregnant (and/or breastfeeding), you are better off avoiding any type of fasting or timed meal schedule until you've normalized your blood glucose and insulin levels, or weaned the baby. Other categories of people that would be best served to avoid fasting include those living with chronic stress, and those with cortisol dysregulation. lose weight When we think of fasting we oftentimes think of people who just don't eat who end up starving themselves for days on end in order to lose weight But that's not what it is here Intermittent fasting is a form of losing weight and it's a diet and lifestyle change that won't harm you nor will it completely ruin your metabolism In fact it's a great way to kickstart the metabolism and help you lose weight How does that work though Well this book will highlight everything that you need to know about intermittent fasting at a beginner level so that you can get the most out of your intermittent fasting experience It is a type of lifestyle eating that's a little different from the rest but I'll explain to you why people do it and how to do it effectively and easily

**Introduction to Science of Fasting for Healthy Body** Ram Babu Sao, 2025-05-20 Fasting has been used for the body to get rid of waste buildup and also for religious and spiritual purification for centuries Nearly every religious text from the Old and New Testaments of the Upanishads as well as Bible to the Quran calls upon followers to fast periodically as a rite of spiritual purification penitence or preparation for union with God Fasting advocates and claims that the practice can effectively treat serious health conditions like diabetes constipation arthritis and colitis to heart disease and depression In his practice he has seen fasting combined with improving the diet before and afterwards which eliminates lupus arthritis and chronic skin conditions like psoriasis and eczema He says he has also seen fasting heal the digestive tracts of those with ulcerative colitis and Crohn's disease and lower blood pressure Fasting followed by a vegetarian diet interferes with the immune system's activities especially if the immune system is overreacting as it does with and other autoimmune diseases He cites half a dozen studies published in medical journals ranging from the American Journal of Physiology Endocrinology and Metabolism to the Scandinavian Journal of Rheumatology Studies published in The Proceedings of the National Academy of Sciences and The Journal of Nutrition in 2003 showed that human beings forced to fast every other day while eating twice the normal amount of food on non fasting days had better insulin control neuronal resistance to injury and other health indicators than people fed calorie restricted diets Fasting may yield psychological benefits as well I use very brief fasting with my patients to help them cope with stress and depression says Agnese Barolo a life coach in contemplative practices in New Rochelle N Y So now many are so encouraged that they try longer fasts she says There is scientific evidence for the curative powers of fasting That is a reason every culture in every country has practised some form of fasting for thousands of years Fasting is not advisable for everyone But for those whose medical conditions do not respond to other treatments Fuhrman says sometimes fasting four to five days a month can help them break to the next level of immune competency He adds that it will only work if you frame the fast with good nutrition before and after Fuhrman cautions that certain people should not fast including Pregnant women People with wasting diseases or malnutrition Those with a history of cardiac arrhythmias People with hepatic or renal insufficiency And anyone who fasts for extended periods should do so only under close medical supervision Fasting gives Longer Life There are hundreds of studies showing that when people are fed fewer calories they live longer says Fuhrman Studies on animals ranging from earthworms to monkeys have shown that

alternating cycles of fasting and very calorie restricted diets are a reliable way to extend the lifespan The excess calories Americans eat they shorten their lives says Fuhrman If you want to live longer Fuhrman s best advice is to eat healthy and fast periodically The time may come Fuhrman says when not offering to fast substantially more effective nutritional approach will be considered malpractice This book Introduction to Science of Fasting for Healthy Body is very fascinating and an exasperating with its simplicity and its vastness The author says that there is no royal road to a perfect understanding of fasting One can realize its vast extent of diseases and guiding symptoms In its present compact form it contains the maximum number of reliable fasting facts in the minimum space
