Natural Causes Essays In Ecological Marxism:

Natural Causes James R. O'Connor, 1998-01-01 This work shows how the policies and imperatives of business and government influence and are influenced by environment and social change. It examines the power of ecological Marxist analysis for grounding economic behaviour in the real world and for formulating political strategies. *The Places of God in an Age of Re-Embodiments* Ruth Thomas-Pellicer, 2017-05-11 In an age of ecological decay Western ontological and epistemological assumptions have to be revisited. This book offers such a revision. It opens with a critical analysis of the paradigm of sustainable development and problematically situates it within the ecocidal trajectory of Western metaphysics. In search of some tools for examining the ecological conundrum the book develops a pool of new categories of knowledge called transpositions. Though of cross disciplinary nature this work must be situated within the tradition of the post Kantian critique of reason. To develop its own framework of analysis it relies heavily upon Nietzsche's oeuvre and that of part of his entourage including Heidegger, Foucault, Derrida and Plotnitsky. Major inputs also come from the work of the ecophilosopher of science Patrick Curry and ecofeminism at large. It will appeal to students and established scholars in environmental studies, ecology and philosophy.

The Ecological Crisis and the Logic of Capital Xueming Chen, 2017-09-11 The worsening environmental crisis has become a serious threat to mankind. The search for a solution to this crisis must begin by understanding its causes. Taking an eco socialist perspective *The Ecological Crisis and the Logic of Capital* explores the logic of capitalism as a fundamental cause of today's environmental crisis in particular the thirst for profit and the capitalist mode of production. By demonstrating the inherent antagonism between capital and ecology this book argues that proposals to resolve the crisis within the capitalist system are utopian. The proposed remedies relying on scientific progress, alternative energies, low carbon technologies or the introduction of ecological ethics and new attitudes toward Nature into market mechanisms are doomed to failure without a radical overhaul of the principles that govern capitalism.

The Green State Robyn Eckersley, 2004-03-05 What would constitute a definitively green state? In this important new book Robyn Eckersley explores what it might take to create a green democratic state as an alternative to the classical liberal democratic state, the indiscriminate growth dependent welfare state and the neoliberal market focused state. Seeking to navigate between undisciplined political imagination and pessimistic resignation to the status quo, in recent years most environmental scholars and environmentalists have characterized the sovereign state as ineffectual and have criticized nations for perpetuating ecological destruction. Going consciously against the grain of much current thinking this book argues that the state is still the preeminent political institution for addressing environmental problems. States remain the gatekeepers of the global order and greening the state is a necessary step. Eckersley argues toward greening domestic and international policy and law. *The Green State* seeks to connect the moral and practical concerns of the environmental movement with contemporary theories about the state, democracy and justice. Eckersley's proposed critical political ecology expands the

boundaries of the moral community to include the natural environment in which the human community is embedded This is the first book to make the vision of a good green state explicit to explore the obstacles to its achievement and to suggest practical constitutional and multilateral arrangements that could help transform the liberal democratic state into a postliberal green democratic state Rethinking the state in light of the principles of ecological democracy ultimately casts it in a new role that of an ecological steward and facilitator of transboundary democracy rather than a selfish actor jealously protecting its territory *Knock on Wood* W. Scott Prudham,2012-11-12 Scott Prudham investigates a region that has in recent years seen more environmental conflict than perhaps anywhere else in the country the old growth forests of the Pacific Northwest Prudham employs a political economic approach to explain the social and economic conflicts arising from the timber industry s presence in the region As well he provides a thorough accounting of the timber industry itself tracing its motivations practices and labor relations

Marx and Nature P. Burkett,1999-02-14 With Marx and Nature Paul Burkett reconstructs Marx s approach to nature society and environmental crisis While recognizing that production is structured by historically developed relations among producers Marx also insists that production as a social and material process is shaped and constrained by natural conditions including the natural condition of human bodily existence Marx s value analysis places him squarely in the camp of the growing number of ecological theorists questioning the ability of monetary and market based calculations to adequately represent the natural conditions of human production and development

Environmental Philosophy Michael E. Zimmerman,2005 This text explores the full spectrum of concerns in contemporary eco philosophy environmental ethics ecofeminism and social justice environmental continental philosophy and political ecology *The Journal of Australian Political Economy* ,2000

Postcolonial Ecocriticism and the Cultural Politics of Nature in Belize Megan Ann Casey,2007 **What is Environmental History?** J. Donald Hughes,2016-01-11 What is environmental history It is a kind of history that seeks understanding of human beings as they have lived worked and thought in relationship to the rest of nature through the changes brought by time In this new edition of his seminal student textbook J Donald Hughes provides a masterful overview of the thinkers topics and perspectives that have come to constitute the exciting discipline that is environmental history He does so on a global scale drawing together disparate trends from a rich variety of countries into a unified whole illuminating trends and key themes in the process Those already familiar with the discipline will find themselves invited to think about the subject in a new way This new edition has been updated to reflect recent developments trends and new work in environmental history as well as a brand new note on its possible future Students and scholars new to environmental history will find the book both an indispensable guide and a rich source of inspiration for future work *Managing Leviathan* Robert Paehlke,Douglas Torgerson,2005-05 Anyone wishing to explore the cutting edge of environmental policy and management will find this book an invaluable tool The Honourable David Anderson Minister of Environment Government of Canada 1999 2004 *Doing Good by Doing Well* Jennifer Lauren Sokolove,2003 *The*

Greening of Business in Developing Countries Peter Utting,2002 A study of the environmental performance of big business It examines corporate self regulation environmental reporting voluntary codes of conduct complementary approaches including governmental regulatory ones and the role of citizens movements NGOs in holding business to account

Commercialization of Biodiversity Michael K. Dorsey,2005 **Conservation, Sustainable Development, and "traditional" People** Gustavo Saes Azenha,2005 *Ethical Marxism* Bill Martin,2008 Argues for a revised Marxism that takes ethics rather than political economy and scientific investigation as its core Provided by publisher Babylon and Beyond Derek Wall,2005-10 Leading writer Boris Kagarlitsky offers an ambitious account of 1000 years of Russian history

Environment & Planning A ,2007-07 **Environment & Planning** ,2009 *Environmental Protection of Urban and Suburban Settlements* ,2007
