Natural Turf For Sport And Amenity Science And Practice:

Natural Turf for Sport and Amenity W. A. Adams, R. J. Gibbs, 1994 This book describes our current knowledge of soils and turfgrass science as applied to the design, production and management of natural turf. The first five chapters cover general principles while further chapters apply these to specific contexts. These include golf courses and bowling greens, soccer, rugby and cricket fields, as well as tennis courts and horse racing tracks. There are also chapters on amenity grass and warm season turfgrass. The book is aimed at students taking courses in turf science and sportsground management, amenity horticulture and landscape and recreation provision and management. It will also be a standard reference work for practitioners working in sportsground management or related subjects such as landscape architecture.

Agricultural Sciences - Volume II Rattan Lal, 2009-10-13 Agricultural Sciences is a component of Encyclopedia of Food and Agricultural Sciences, Engineering and Technology Resources in the global Encyclopedia of Life Support Systems (EOLSS) which is an integrated compendium of twenty one Encyclopedias. The theme on Agricultural Sciences with contributions from distinguished experts in the field discusses this multi-disciplinary field that encompasses the parts of exact natural, economic and social sciences that are used in the practice and understanding of agriculture. These two volumes are aimed at the following five major target audiences: University and College students, Educators, Professional practitioners, Research personnel and Policy analysts, managers and decision makers and NGOs.

Horticulture: Plants for People and Places, Volume 2 Geoffrey R. Dixon, David E. Aldous, 2014-06-10 This Trilogy explains What is Horticulture. Volume two of Horticulture Plants for People and Places analyses in depth the scientific, managerial and ecological concepts which underpin Environmental Horticulture. Chapters describe Horticulture and the Environment, Woody, Ornamentals, Herbs and Pharmaceuticals, Urban Greening, Rural Trees, Urban Trees, Turfgrass Science, Interior and External Landscaping, Biodiversity, Climate Change and Organic Production. Each is written by leading international experts. Sustainable use of resources and careful conservation are critically essential for the continuation of life on this Planet. Achieving this is where horticulture, natural flora and fauna and the environment interact in achieving sustainable development. Horticulture is the fundamental partner of ecological and environmental science and provides an understanding of eco system services. Live plant networks are essential for rural and urban life. They are integral parts of natural communities, the context of historic and modern architecture and a means for rejuvenating cities and uniting communities. Plants provide urban, peri-urban and rural employment, business and tourism opportunities, leisure, rest and relaxation. These facets of Environmental Horticulture are clearly described in this book.

International Turf Management David Aldous, 2014-06-17 Many leisure activities involve the use of turf as a surface. Grass surfaces on golf courses, bowling clubs, cricket pitches, racetracks and parks all require maintenance by trained personnel. International Turf Management Handbook is written by a team of international experts. It covers all aspects of turf management and in particular the selection and establishment of grass varieties, soils, irrigation and drainage, performance testing and playing.

qualities issues relating to specific playing surfaces In its depth of coverage and detailed practical advice from around the world this comprehensive handbook is destined to become the standard reference work on the subject The Soil Underfoot G. Jock Churchman,Edward R. Landa,2014-04-21 The largest part of the world's food comes from its soils either directly from plants or via animals fed on pastures and crops Thus it is necessary to maintain and if possible improve the quality and hence good health of soils while enabling them to support the growing world population The Soil Underfoot Infinite Possibilities for a Finite Resource arms readers with historical wisdom from various populations around the globe along with current ideas and approaches for the wise management of soils It covers the value of soils and their myriad uses viewed within human and societal contexts in the past present and supposed futures In addition to addressing the technical means of maintaining soils this book presents a culturally and geographically diverse collection of historical attitudes to soils including philosophical and ethical frameworks which have either sustained them or led to their degradation Section I describes major challenges associated with climate change feeding the increasing world population chemical pollution and soil degradation and technology Section II discusses various ways in which soils are or have been valued including in film and contemporary art as well as in religious and spiritual philosophies such as Abrahamic religions Maori traditions and in Confucianism Section III provides stories about soil in ancient and historic cultures including the Roman Empire Greece India Japan Korea South America New Zealand the United States and France Section IV describes soil modification technologies such as polymer membrane barriers and soil uses outside commercial agriculture including the importance of soils for recreation and sports grounds The final section addresses future strategies for more effective sustainable use of soils emphasizing the biological nature of soils and enhancing the use of green water retained from rainfall *Horticultural Abstracts* ,1995 *The Journal of the Sports Turf Research Institute* Sports Turf Research Institute (Bingley, England),1993 *Turfgrass* John C.
