devour the decaying flesh off of animal skeletons that are destined for the museum's specimen collection. That time saving process was developed and perfected at the University of Kansas Natural History Museum by Charles D Bunker a lowly assistant taxidermist who would rise to become the curator of recent vertebrates and who made an indelible mark on his field. That innovative breakthrough serves as a testament to the tenacity of a quietly determined naturalist. Bunker was part of the small team of men who constructed and installed the famous Panorama of North American Mammals the centerpiece exhibit of the KU Natural History Museum located in Dyche Hall. That iconic building on the KU campus was expressly built to house the collection of mounted animals that impressed the world a decade earlier at the 1893 Chicago Columbian Exposition and World's Fair. Once the panorama was completed Bunker turned his attention to field collecting. Bunker's field notes provide an accurate authentic account of several expeditions to collect such specimens as well as a rare view of the extreme hardships of fieldwork in those early days. Perhaps most notable is Bunker's 1911 expedition to western Kansas where he discovered the fossil remains of a forty five foot long sea serpent later identified as *Tylosaurus proriger* an aquatic reptile from the mosasaur genus and the largest example of the species found in North America. In 2014 *Tylosaurus* was named the marine fossil of the state of Kansas. Birds Bones and Beetles tells the story of a man whose passion for learning led to remarkable discoveries, extraordinary exhibits and the prestigious careers of many students he mentored in the natural sciences. *A Naturalist's Guide to the Birds of Borneo* 4/e Wong Tsu Shi, 2023-07. *A Naturalist's Guide to the Birds of Borneo* is an introductory photographic identification guide to 280 bird species commonly seen in on the island of Borneo covering Sabah Sarawak Brunei and Kalimantan and is perfect for resident and visitor alike. High quality photographs from one of Borneo's top nature photographers are accompanied by detailed species descriptions which include nomenclature, size, distribution, habits and habitat. The user friendly introduction covers geography and climate, vegetation opportunities for naturalists and the main sites for viewing the listed species. Also included is an all important checklist of all of the birds of Borneo encompassing for each species its common and scientific name, IUCN status and its status in each state of Borneo.
