## **Navigating Complexity In International Development Facilitating Sustainable Change At Scale:**

**Navigating Complexity in International Development** Danny Burns, Stuart Worsley, 2015     The Project in International Development Caitlin Scott, 2023-06-26 The project has become fundamental to international development and humanitarian practice playing a key role in defining objectives funding streams and ultimately determining what success looks like This book provides a much needed overview of the project in international development practice guiding the reader through the latest theoretical debates and exploring the core tools and stages of planning and design The book starts with an overview of the role of the project through development history before taking the reader through the stages of a standard project management cycle Each chapter introduces the stage the most common tools used to support that phase of planning and the critical debates that exist around it with examples to illustrate discussions from around the world and a range of development fields The book explores the challenges to working effectively in contemporary aid contexts including the role of politics and the pressures wrought by the demands to demonstrate quantified results Throughout the book argues for the need to see the project as a form of governmentality that arranges resources and people in time and space and that extends neoliberal forms of managerial control in the sector Ending with suggestions for innovation this book is perfect for anyone looking for an accessible and engaging guide to the international development project whether student researcher or practitioner     Conferences as Sites of Learning and Development Ortrun Zuber-Skerritt, 2017-02-24 This book aims to apply and expand upon the concept of the Learning Conference which uses the paradigm and methodology of participatory action learning and action research PALAR It demonstrates how application of the Learning Conference concept can maximize learning opportunities and subsequently successful research outcomes through publication of conference papers to help bring about sustainable professional organizational and community development     **Researching Development NGOs** Susannah Pickering-Saqqa, 2023-05-23 This book offers a critical insight into how the study of NGOs can be more theoretically grounded and methodologically creative The role of NGOs in global development has been the focus of considerable research and scholarship for the last four decades More recently scholars and NGO practitioners have begun to explore their relationships and how research can better inform practice and vice versa This book addresses questions arising from such research including how different theoretical perspectives can be applied to the study of NGOs what kinds of data can be used when trying to better understand NGOs and what methods can be used in studying NGOs Rather than evaluating the impact of NGO work this is a book about how researchers and practitioners can better understand what NGOs do and how they operate Bringing together work from a range of NGO researchers working across diverse disciplines and at varied stages of their academic careers the collection is supported by recent case studies in the field as well as dilemma boxes and discussion questions in every chapter As such Researching Development NGOs is an essential resource for postgraduate students of Research Methods in Development Studies NGOs and Development Management as well as practitioners wanting

to find out more about the sector      [A Theology of International Development](#) Thia Cooper, 2020-02-05 Religion and development have been intertwined since development's beginnings yet faith based aid and development agencies consistently fail to consider how their theology and practice intersect This book offers a Christian theology of development with practical solutions to bridge the gap and return to truly faith based policies and practices Development aims to raise the living standard of the world's poor mainly through small scale projects that increase economic growth A theology of liberation provided a critique to development practice but a specific theology of development is still lacking and many faith based aid agencies have failed to adapt their practice In applying theological thinking to development the author argues that aid agencies need to address the entrenchment of unequal power relations and embrace a holistic notion of development defined by the needs of those most marginalized instead of by a focus on economic growth Development organisations need to consider the distinction between charity and justice and to empower people in the Global South paying particular attention to the intersections of race class sexuality religion and the environment Overall this book is a powerful call to upend development practice as it currently exists and to return faith based organizations to following Christian practices It will be an important read for religion and development researchers practitioners and students      *Action Learning and Action Research* Ortrun Zuber-Skerritt, Lesley Wood, 2019-03-11 Action Learning and Action Research deepens understanding and contributes to new knowledge about the theory practice and processes of Action Learning AL and Action Research It clarifies what constitutes AL AR in its many forms and what it is not      **The SAGE Handbook of Participatory Research and Inquiry** Danny Burns, Jo Howard, Sonia M. **Reclaiming Value in International Development** Chloe Schwenke, 2009 International development has complex unintended effects on the realities of equity rights governance and conflict in poor countries Yet the myriad moral questions and quandaries encountered at every turn by development policymakers and practitioners are seldom thought about or articulated in a rigorous fashion Instead development specialists are trained to focus on the technocratic aspects of economic aid delivery and to disregard the moral issues raised by the adverse collateral consequences of aid programs for many people communities institutions and environments in the developing countries Reclaiming Value in International Development is the first book to bridge the divide between ethics and development from the perspective of a seasoned development practitioner who is also a trained ethicist Schwenke formally enlarges the concept of development to include its moral dimension to denote beneficial change that alleviates human misery and environmental degradation in poor countries and reinforces universal ethical norms such as human dignity essential freedoms social justice peace civic virtue human flourishing the common good gender equality safety and security and participation and inclusion She applies this ethically expanded concept to nine key topics in international development education leadership procurement food security conflict urbanization gender identity and sexual orientation deliberative participation and the measurement of ethical performance Throughout the book the author draws on her thirty years of experience as a development practitioner in thirty poor countries around the world to give vivid real life illustrations of the classic moral dilemmas in development ethics and to show how moral reasoning can

clarify and resolve them      **Managing for Sustainable Development Results** ,2019 These 2019 Principles help providers of development and humanitarian co operation navigate complex challenges to reach their expected results in terms of sustainable development Building on the Managing for Development Results principles endorsed by development agencies at the international roundtable on results in Marrakech February 2004 they set out a renewed practice that takes into account the changing global context and expanding array of actors
