(3rd ed.)**

Neale, M. D. (1999). Melbourne: ACER. ISBN 0864312989 (Teachers Manual), ISBN 086431325X (Reader).

This set of materials continues a tradition begun in 1958 with the publication of the original test. Since that time there have been numerous reprints and a revision of the second edition. While over this long time frame the popularity of 'testing' has been continually debated, the utility of the previous editions attests to the real needs it has fulfilled for classroom and specialist teachers.

For those well acquainted with earlier editions, there is a familiar ring which is reassuring and may initially tend to hide the many improvements. The tradition and model adopted and developed in the earlier editions has been further advanced in this offering. Some of the numerous changes made on this occasion include, new 'parallel' passages, expansions to The Diagnostic Tutor and six Supplementary Diagnostic Tests. In addition, there has been greater use made of colour coding of the materials, improved setting out and a range of other changes to ease administration and scoring.

New Australian norms from the standardisation study in 1997 have been provided, along with a wealth of specific information on scoring and interpretation. Associated with the 'technical' information related to issues such as parallel form reliability, internal consistency and validity, there is a high

degree of relevant discussion and information supporting the new data.

In this new Neale there is a wealth of advice about the diagnostic opportunities which arise through the use of such a test. This advice will be valuable to all 'teachers' but especially those less experienced. In addition the 'results' are able to be presented in the full range of ways and can be related to National Profile Levels.

If you do counselling within schools, this book is for you. Based upon Narrative Therapy, it opens up fresh ways to talk about the intimate, daily struggles of both students and teachers so as to create more meaningful and satisfying lives.

It is based on the idea that we all generate stories to make sense of ourselves and the circumstances of our lives. However, we are not the sole authors of our stories. Many of the dominant stories were generated in our early experiences of childhood at home, at school, at church, and in our neighbourhood. Some of these dominant stories regularly influence the way we think about ourselves. Often,
