Near Infrared Spectroscopy Principles Instruments Applications:

Near-Infrared Spectroscopy Heinz W. Siesler, Yukihiro Ozaki, Satoshi Kawata, H. Michael Heise, 2008-07-11 Over the last few years near infrared NIR spectroscopy has rapidly developed into an important and extremely useful method of analysis. In fact, for certain research areas and applications ranging from material science via chemistry to life sciences, it has become an indispensable tool because this fast and cost-effective type of spectroscopy provides qualitative and quantitative information not available from any other technique. This book offers a balanced overview of the fundamental theory and instrumentation of NIR spectroscopy, introducing the material in a readily comprehensible manner. A considerable part of the text is dedicated to practical applications, including sample preparation and investigations of polymers, textiles, drugs, food, and animal feed. However, special topics such as two-dimensional correlation analysis are also covered in separate chapters. Written by eight experts in different fields, this book presents an introduction to the current state of developments and is valuable to

Heinz W. Siesler, 2009 Near-Infrared Spectroscopy Yukihiro Ozaki, Christian Huck, Satoru Tsuchikawa, Søren Balling Engelsen, 2020-11-13 This book provides knowledge of the basic theory, spectral analysis methods, chemometrics, instrumentation, and applications of near infrared NIR spectroscopy, not as a handbook but rather as a sourcebook of NIR spectroscopy. Thus, some emphasis is placed on the description of basic knowledge that is important in learning and using NIR spectroscopy. The book also deals with applications for a variety of research fields that are very useful for a wide range of readers, from graduate students to scientists and engineers in both academia and industry. For readers who are novices in NIR spectroscopy, this book provides a good introduction, and for those who already are familiar with the field, it affords an excellent means of strengthening their knowledge about NIR spectroscopy and keeping abreast of recent developments.
