A Cyclical Model of Literacy Learning Adrienne Minnery, Antony T. Smith, 2024 This book introduces the Cycle of Responsibility COR model the next step in the evolution of the Gradual Release of Responsibility model which has been a conceptual mainstay of literacy education for decades. This new model shifts the current linear model to a cyclical process of multifaceted interactions that better reflect the complexities of early literacy and with an emphasis on constructing knowledge together in the context of vibrant learning communities. Focused on reading, writing, and word study in the primary grades, the COR is put into motion through five key motivators: challenge, creativity, collaboration, choice, and independence. Vignettes demonstrate how to enact COR in classroom contexts. This practical resource is based on the authors' shared research and teaching experiences in employing the COR to empower children as literacy learners and teachers as agents of impactful instruction. Book Features: Presents the Cycle of Responsibility model, a new field tested teaching and learning model; Moves away from linear task completion to a cyclical collaborative process that reflects the energetic, complex, and creative world of classrooms; Provides a teacher centric approach that emphasizes shared construction of knowledge and the forces that motivate young learners; Includes vignettes from the author's first grade classroom to illustrate ideas in practice as well as a chapter on teacher professional learning. This book is a great example of how committed scholars of practice can transport research based practices into a discourse that speaks to teachers. Read it Try it You'll like it. From the Foreword by P. David Pearson, emeritus professor, UC Berkeley.
