to return to what's worked for us in the past. This book offers a straightforward process for rewiring ourselves and those we lead to be more change capable. Erika Andersen says avoiding change has been a historical imperative. In this book she shows how we can overcome that reluctance and get good at making necessary change. Using a fictional story about a jewelry business changing generational hands, Andersen lays out a five step model for addressing both the human side of change and its practical aspects. Step 1: Clarify the change and why it's needed. Get clear on what the change is and the benefits it will bring. Step 2: Envision the future state. Build a shared picture of the post change future. Step 3: Build the change. Bring together a change team, engage key stakeholders and plan the change. Step 4: Lead the transition. Build a transition plan that supports the human side of the change, then engage the whole organization in making the change. Step 5: Keep the change going. Work to make your organization permanently more change capable. With opportunities to self reflect and try out the ideas and approaches throughout this book, it is a practical guide to thriving in this era of nonstop change.

**Handbook of Media Technology and Innovation** Richard A. Gershon, 2025-01-27. The De Gruyter Handbook of Media Technology and Innovation brings together scholars from around the world to provide key insights on emerging technology trends and issues related to the fields of media management, information technology, product design, planning and digital lifestyle. This handbook is about the power of good ideas. It's about those business enterprises, government planners, educators and entrepreneurs that have harnessed the power of good ideas to become real difference makers in the world we live in. Keeping pace with fast paced technology change requires ongoing assessment and reassessment of the media management and technology fields to address important questions and emerging issues. A major premise of this book is that given the complex and ever changing state of media technology, we have a responsibility and obligation to engage in a broader interdisciplinary dialogue whose purpose is to understand the current and future state of media technology and innovation, as well as to appreciate the social impact that such technologies have on business education and the general public. Forecasting the future as any weatherperson or stock broker can tell you is a risky business. But in this book we use the phrase the creative next step as a way to talk about the future and what we can expect in terms of the opportunities and challenges going forward.
