**The Political Economy and Feasibility of Bitcoin and Cryptocurrencies** Pack, Spencer J., 2022-05-13 In The Political Economy and Feasibility of Bitcoin and Cryptocurrencies Spencer J Pack brings his authority as a scholar and advisor to this study of bitcoin and cryptocurrencies from the perspective of the history of economic thought. Major theorists analyzed in depth include Aristotle, Smith, Law, Marx, Keynes, Rothbard, and Hayek, and the book draws extensively upon the ideas of Schumpeter, Galbraith, and Sraffa. The book argues for reconceptualization of the basic microeconomic categories into rental sale and financial asset prices along with a reconsideration of Keynes' general theory to his special theory and Rothbard's relationship to Rousseau. The author posits that intense theoretical and practical struggles will continue over who should control the quantity of money, the cause of the capitalist economy's instability, and who or what is more dangerous: concentrated centers of private wealth and private enterprises or the contemporary state. He concludes that in terms of the quality of money, the cryptocurrency community is probably correct with new forms of money potentially being better than sovereign fiat currency. The book's relevance will appeal to members of the history of economic thought community, economic theorists, and political science and political theory scholars, as well as to policy makers and members of the cryptocurrency community. **Allgemeine Zeitung**, 1890 **New York**, 1972 **The New Normal** H Chaturvedi, Ajoy Kumar

Dey, 2021-03-10 When the COVID 19 pandemic hit the world was caught unprepared. We had faced several disruptions including pandemic but not at this level. It brought everything to a grinding halt as nationwide lockdowns were imposed to stop the spread of infection. Businesses struggled and then rose to the occasion to manage their work by redefining their business structure, work culture and strategies. This book has a collection of articles that are not just opinions and projections about future but phenomenon based articles explored through theoretical lens and are not just limited to business and economy but ecological changes as well. The authors who have shared their knowledge and research hail from Bangladesh, New Zealand, Pakistan, Sri Lanka, UK, USA and Vietnam beside India. The diverse background of authors that include University Vice Chancellors, Directors, Distinguished Professors and Senior Executives from the industry brings their unique perspective and insights in the articles. The 27 articles in this book are divided in 5 sections namely Higher Education, Rebuilding Itself, Surviving the Crisis, Evolving Business Models and Organizational Strategies, Way Forward for the Economy, Impact on the Ecosystem and Society. Each article demystifies the multidimensional impact that the pandemic has had on the professional and personal spheres of the human lives.
