A lot of people know a lot of stuff and most of us don't get to share the best bits with other people. So this book gets together twenty one recent graduates to share something they think you should know. Among other things you can learn: Why you should care about Japan's ageing population, How a baby is made after the fun bit, How the English and Scottish dealt with witches, Why we should think about disasters a bit differently, How performance analysis works in sport. Our editors graduated from university in 2008 during the last once in a lifetime financial armageddon. The idea behind this book was to allow recent graduates who are hitting the real world a full twelve years after it went wrong last time an opportunity to do something interesting with their time. Our experience tells us the next few years worth of graduates will spend a long time being called lazy and stupid for the crime of being born about twenty one years before it all went pear shaped. So for our authors at least they will have something to point at that they have achieved to disprove that. But mostly we just wanted to get together twenty one chapters worth of stuff we didn't know before.
