Deepak Maini

Navisworks Simulate User Guide 2015:

Delivering Value with BIM Adriana Sanchez, Keith Hampson, Simon Vaux, 2016-03-31 Building Information Modelling BIM is a global phenomenon which is gaining significant momentum across the world. Currently there is little information on how to realise and monitor benefits from implementing BIM across the life cycle of a built environment asset. This book provides a practical and strategic framework to realise value from implementing BIM by adapting Benefit Realisation Management theory. It presents an approach for practitioners aiming to implement BIM across the life cycle of built environment assets including both buildings and infrastructure. Additionally, the book features wide-ranging information about BIM, the challenges of monitoring progress towards benefit goals and the greater context of implementation; a set of dictionaries that illustrate how benefits can be achieved; what the benefit flows are and the enabling tools and processes that contribute to achieving and maximising them; a suite of measures that can serve to monitor progress with examples of how they have been used to measure benefits from BIM; real-world examples from across the world and life cycle phases that show how these benefits can be achieved; and information on international maturity and competency measures to complement the value realisation framework. Including a blend of academic and industry input, this book has been developed in close collaborative consultation with industry, government and international research organisations and could be used for industry courses on BIM benefits and implementation for asset management or by universities that teach BIM-related courses.

Proceedings of the 23rd International Symposium on Advancement of Construction Management and Real Estate Fenjie Long, Sheng Zheng, Yuzhe Wu, Gangying Yang, Yan Yang, 2021-02-02 This book presents the proceedings of CRIOCM2018 23rd International Symposium on Advancement of Construction Management and Real Estate, sharing the latest developments in real estate and construction management around the globe. The conference was organized by the Chinese Research Institute of Construction Management (CRIOCM) working in close collaboration with Guizhou Institute of Technology (GIT). Written by international academics and professionals, the proceedings discuss the latest achievements, research findings and advances in frontier disciplines in the field of construction management and real estate. Covering a wide range of topics including New type urbanization, land development and land use, urban planning and infrastructure, construction, housing market and housing policy, real estate finance and investment, new theories and practices on construction project management, smart city, BIM technologies and applications, construction management in big data era, green architecture and eco-city, rural rejuvenation and eco-civilization, other topics related to construction management and real estate, the discussions provide valuable insights into the advancement of construction management and real estate in the new era. The book is an outstanding reference resource for academics and professionals alike.

Hydraulic and Civil Engineering Technology VIII Mijia Yang, Pijush Samui, João C.G. Lanzinha, Jianhui Hu, 2023-12-15 All of us are dependent on a built environment constructed and maintained by civil and hydraulic engineers, and for those working in these fields, keeping

up to date with the latest technological developments is vital for the safe and efficient design and operation of this infrastructure This book presents the proceedings of HCET 2023 the 8th International Technical Conference on Frontiers of Hydraulic and Civil Engineering Technology held from 25-27 September 2023 in Wuhan China HCET is an international conference which aims to enhance the development of hydraulic and civil engineering in China with a focus on high end intelligent and green technologies It seeks to do this by consolidating global wisdom and achievements and providing scientific support HCET also offers an excellent opportunity for scientists researchers and engineers from around the world to exchange their findings and discuss developments establishing a basis for national and international collaboration A total of 316 contributions were received for the 2023 edition of which 187 were ultimately accepted after a rigorous review process and checks for quality and plagiarism Topics covered include the research and development of concrete structure design and analysis structural mechanics and structural engineering building and future materials hydraulic engineering geological exploration and earthquake engineering building technology urban planning road bridge and traffic engineering energy infrastructure environmental engineering and advanced engineering technologies and interdisciplinary sciences and applications Covering a wide range of subjects related to hydraulic engineering and civil engineering technology and associated transdisciplinary sciences the book will be of interest to all those working in the field

Science and Digital Technology for Cultural Heritage - Interdisciplinary Approach to Diagnosis, Vulnerability, Risk Assessment and Graphic Information Models Pilar Ortiz Calderón, Francisco Pinto Puerto, Philip Verhagen, Andrés Prieto, 2019-11-28

The scientific and technological advances that influence the protection of cultural heritage are developing at an ever increasing pace Systems to explore research and analyse their materiality to control the different scopes or to represent and model them have reached an unprecedented dimension in recent decades The Network of Science and Technology for the Conservation of Cultural Heritage aims to promote collaboration between the agents of these systems in order to facilitate the sharing of experiences and to foster technology transfer with the common goal of contributing to the conservation of Cultural Heritage In the context of the TechnoHeritage Network the fourth edition of the International Congress on Science and Technology for the Conservation of Cultural Heritage was held March 26-30 2019 in Seville Spain This Congress was an international meeting of researchers and specialists from multiple areas whose line of work is the knowledge and conservation of Cultural Heritage Among all the topics discussed the role and impact of digital technologies for the knowledge maintenance management and dissemination of cultural heritage should be highlighted Digital media modify the way of understanding this heritage of perceiving it and transmitting it and offer a new horizon of strategies to make decision making more sustainable over time
