setups enabling a wide range of further applications The approach is explained using programmable vertex and fragment processors with current hardware and compared to highly optimized CPU implementations It is shown that the new approach can outperform the latter by more than one magnitude The downloadable introduction has been written specifically for this offer Its contents are only a subset of the real introductory chapter of the thesis **Build a Large Language Model (From Scratch)** Sebastian Raschka,2024-10-29 Learn how to create train and tweak large language models LLMs by building one from the ground up In Build a Large Language Model from Scratch bestselling author Sebastian Raschka guides you step by step through creating your own LLM Each stage is explained with clear text diagrams and examples You ll go from the initial design and creation to pretraining on a general corpus and on to fine tuning for specific tasks Build a Large Language Model from Scratch teaches you how to Plan and code all the parts of an LLM Prepare a dataset suitable for LLM training Fine tune LLMs for text classification and with your own data Use human feedback to ensure your LLM follows instructions Load pretrained weights into an LLM Build a Large Language Model from Scratch takes you inside the AI black box to tinker with the internal systems that power generative AI As you work through each key stage of LLM creation you ll develop an in depth understanding of how LLMs work their limitations and their customization methods Your LLM can be developed on an ordinary laptop and used as your own personal assistant About the technology Physicist Richard P Feynman reportedly said I don t understand anything I can t build Based on this same powerful principle bestselling author Sebastian Raschka guides you step by step as you build a GPT style LLM that you can run on your laptop This is an engaging book that covers each stage of the process from planning and coding to training and fine tuning About the book Build a Large Language Model From Scratch is a practical and eminently satisfying hands on journey into the foundations of generative AI Without relying on any existing LLM libraries you ll code a base model evolve it into a text classifier and ultimately create a chatbot that can follow your conversational instructions And you ll really understand it because you built it yourself What s inside Plan and code an LLM comparable to GPT 2 Load pretrained weights Construct a complete training pipeline Fine tune your LLM for text classification Develop LLMs that follow human instructions About the reader Readers need intermediate Python skills and some knowledge of machine learning The LLM you create will run on any modern laptop and can optionally utilize GPUs About the author Sebastian Raschka PhD is an LLM Research Engineer with over a decade of experience in artificial intelligence His work spans industry and academia including implementing LLM solutions as a senior engineer at Lightning AI and teaching as a statistics professor at the University of Wisconsin Madison Sebastian collaborates with Fortune 500 companies on AI solutions and serves on the Open Source Board at University of Wisconsin Madison He specializes in LLMs and the development of high performance AI systems with a deep focus on practical code driven implementations He is the author of the bestselling books Machine Learning with PyTorch and Scikit Learn and Machine Learning Q and AI The technical editor on this book was David Caswell Table of Contents 1 Understanding large language models 2 Working with
