Learning in Document Analysis and Recognition Simone Marinai,Hiromichi Fujisawa,2007-12-27 The objective of Document Analysis and Recognition DAR is to recognize the text and graphicalcomponents of a document and to extract information With rst papers dating back to the 1960 s DAR is a mature but still gr ing research eld with consolidated and known techniques Optical Character Recognition OCR engines are some of the most widely recognized pr ucts of the research in this eld while broader DAR techniques are nowadays studied and applied to other industrial and o ce automation systems In the machine learning community one of the most widely known search problems addressed in DAR is recognition of unconstrained handwr ten characters which has been frequently used in the past as a benchmark for evaluating machine learning algorithms especially supervised classi ers However developing a DAR system is a complex engineering task that involves the integration of multiple techniques into an organic framework A reader may feel that the use of machine learning algorithms is not approp ate for other DAR tasks than character recognition On the contrary such algorithms have been massively used for nearly all the tasks in DAR With large emphasis being devoted to character recognition and word recognition other tasks such as pre processing layout analysis character segmentation and signature veri cation have also bene ted much from machine learning algorithms **Forthcoming Books** Rose Arny,2003-04 *Subject Guide to Books in Print* ,1991 *Fuzzy Logic and Neural Network Handbook* Chi-hau Chen,1996 A practical reference that presents concise and comprehensive reports on the major activities in fuzzy logic and neural networks with emphasis on the applications and systems of interest to computer engineers Each of the 31 chapters focuses on the most important activity of a specific topic and the chapters are organized into three parts principles and algorithms applications and architectures and systems The
