## 1. Introduction

SAP R/3 is an “integrated and industry-independent standard software” which covers integrates and connects all functional areas in a business. SAP AG defines integration as “defined communication”. Although R/3 is designed for complete integration, it can also be used for a couple of business areas.

SAP is the abbreviation for “**Systems Applications and Products in Data Processing**”.

The purpose of this document is to provide an overview of SAP PM Functionality and the details of how the transactions are carried out in SAP R/3.

The document has been organized as follows:

- ❖ Master data maintenance required for PM module is covered first. Master data maintenance is the most important aspect as these data affects all the transaction where that Master data is used. It is very much controlled by authorizations as per the policy of the company.
- ❖ As a PM user, you will be using various transactions to replicate day-to-day work in SAP R/3. So all the transactions, which are relevant to you for carrying out Plant Maintenance activities, are covered in this.
