Haghi,2025-03-28 This book analyzes the harmful effects of conventional waste treatments and pollution monitoring methods on the environment It critically evaluates these methods and highlights their shortcomings that have significantly damaged the environment The book provides a comprehensive overview of alternative waste and pollution treatment methods that can be adopted locally and internationally It also examines appropriate resource management strategies for environmental issues and emphasizes the need for sustainable resource management practices The book highlights the importance of education in achieving ecological sustainability particularly in urban waste management It elaborates on how education can raise awareness and promote sustainable waste management practices Furthermore the book presents the latest research topics innovative ideas and remediation strategies for various hazardous pollutants related to environmental issues and solutions It provides a detailed analysis of the different remediation strategies and highlights their effectiveness in tackling environmental issues The book also explores the innovative use of nanotechnology to achieve ecological sustainability and economic feasibility in wastewater treatment One of the standout features of this approach is the use of microbial consortiums which offer significant advantages over pure cultures The need

for hybrid treatment technology to effectively remediate different types of organic and inorganic pollutants from wastewater is also explored. In addition, the book highlights the application of green technology for waste management providing innovative solutions using advanced green technologies that promote international cooperation and networking to achieve a sustainable environment. It covers advanced green technologies used to manage energy and bioproducts from waste such as biofuel, biopolymers, fertilizers, and chemicals without causing harm to the environment.

Advances in Sewn Product Technology Anita Mitchell, 2024-05-09

The fashion industry continues to contribute significantly to greenhouse gas emissions. It is one of the biggest polluters, one of the most wasteful of all global industries, and is under increasing pressure to address unsustainable practice. Emerging out of the pandemic era, the fashion industry is also responding to a variety of complex industry challenges such as high return rates, customer demand for better fitting apparel, faster fashion, the drive towards personalisation, and greater transparency and sustainability across the value chain. These factors, along with increasing labour costs, are furthermore exerting force on the industry to embrace nearshoring and reshoring. Based on extensive primary research involving oral histories methodology with leading industry professionals involved in the innovation of technological and digital solutions for the fashion industry, this book presents the latest advances in sewn product technology which offer solutions to many of the fashion industry's current and emerging challenges whilst also informing how these developments are influencing fashion jobs of today and tomorrow. This book is therefore of value to fashion students, academics, researchers, and technicians, as well as those working within the fashion industry involved in the design, development, manufacture, buying, and retail of fashion apparel.

Features: Provides a comprehensive insight into the latest advances in sewing machine technology including advanced automation and robotics used in the manufacture of fashion apparel. Provides a comprehensive insight into the latest industrial sewing threads and needles that can effectively support sustainable design practice. Exclusively covers advances in digital technologies to support sustainable practice including advances in 3D body scanning and digital measuring systems, recent advances in digital pattern making and pattern design systems, recent advances in 3D fashion design software, and the latest advances in Product Lifecycle Management (PLM) systems used within the fashion industry. Includes sections on advances in No Sew Seam Bonding and ultrasonic welding technologies. Provides an insight into advancements in 3D cloth simulation and prototyping for apparel design and gaming. Enables readers to understand the impact of the latest advances in sewn product technology on the jobs of today and tomorrow. Case studies that provide working examples of advances in sewn product technology.

Cooperative Localization and Navigation Chao Gao, Guorong Zhao, Hassen Fourati, 2019-08-21

This book captures the latest results and techniques for cooperative localization and navigation drawn from a broad array of disciplines. It provides the reader with a generic and comprehensive view of modeling strategies and state estimation methodologies in that field. It discusses the most recent research and novel advances in that direction, exploring the design of algorithms and architectures, benefits, and challenging aspects, as well as a
