Committee on Governmental Affairs, 1995 *Opening Science* Sönke Bartling, Sascha Friesike, 2013-12-16 Modern information and communication technologies together with a cultural upheaval within the research community have profoundly changed research in nearly every aspect. Ranging from sharing and discussing ideas in social networks for scientists to new collaborative environments and novel publication formats knowledge creation and dissemination as we know it is experiencing a vigorous shift towards increased transparency, collaboration and accessibility. This book provides researchers, decision makers and other scientific stakeholders with a snapshot of the basics, the tools and the underlying visions that drive the current scientific evolution often called Open Science.

Team Science Success Kara L. Hall, Amanda L. Vogel, Robert T. Croyle, 2019-11-13 Collaborations that integrate diverse perspectives are critical to addressing many of our complex scientific and societal problems. More than 100 experts including scientists, administrators and funders from a wide range of disciplines and professions explain evidence based principles, highlight state of the art strategies, tools and resources and share first person accounts of how they've applied them in their own successful team science initiatives. While many examples draw from cross disciplinary team science initiatives in the health domain, the handbook is designed to be useful across all areas of science. *Strategies for Team Science Success* will inspire and enable readers to embrace cross disciplinary team science by articulating its value for accelerating scientific progress and by providing practical strategies for success.
