*Ludicrous* Edward Niedermeyer, 2019-08-20 Tesla is the most exciting car company in a generation but can it live up to the hype Tesla Motors and CEO Elon Musk have become household names shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom The company s market valuation now rivals that of long established automakers and to many industry observers Tesla is defining the future of the industry But behind the hype Tesla has some serious deficiencies that raise questions about its sky high valuation and even its ultimate survival Tesla s commitment to innovation has led it to reject the careful zero defects approach of other car manufacturers even as it struggles to mass produce cars reliably and with minimal defects While most car manufacturers struggle with the razor thin margins of mid priced sedans Tesla s strategy requires that the Model 3 finally bring it to profitability even as the high priced Roadster and Model S both lost money And Tesla s approach of continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans In Ludicrous journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces Blending original reporting and never before published insider accounts with savvy industry analysis

Niedermeyer tells the story of Tesla as it's never been told before with clear eyes objectivity and insight *The Coevolution Quarterly*, 1977 Driverless Cars, Urban Parking and Land Use Robert A. Simons, 2020-02-05 The subject of driverless and even ownerless cars has the potential to be the most disruptive technology for real estate land use and parking since the invention of the elevator This book includes new research and economic analysis plus a thorough review of the current literature to pose and attempt to answer a number of important questions about the effect that driverless vehicles may have on land use in the United States especially on parking Simons outlines the history of disruptive technologies in transport and real estate before examining how the predicted changes brought in by the adoption of driverless technologies and decline in car ownership will affect our urban areas What could we do with all the parking areas in our cities and our homes and institutional buildings that may no longer be required Can they be sustainably repurposed Will self driving cars become like horses used only by hobbyists for recreation and sport While the focus is on parking the book also contains the views of real estate economists architects and policymakers and is essential reading for real estate developers and investors transport economists planners politicians and policymakers who need to consider the implications of a future with more driverless vehicles Fasten your seat belt like it or not driverless cars will begin to change the way we move about our cities within ten years The Electrical World, 1892 *Electrical Times ...*, 1891 Public Opinion, 1892 Research & Development, 1997-10 *English Mechanic and Mirror of Science*, 1883 *Good Health*, 1898 **Science** John Michels (Journalist), 1958 **Automotive News**, **Practical Engineer**, 1894 *Vanity Fair*, 2017 **English Mechanic and World of Science**, 1893
