Fortune , Social Media Marketing on Instagram. Exploration of Strategic Perspectives Lisa Jessen,2018-06-20 Master s Thesis from the year 2018 in the subject Communications Public Relations Advertising Marketing Social Media grade 1 7 University of Potsdam language English abstract With 800 million users worldwide Instagram is one of the world s leading social media platforms The reason for the increasing relevance of Instagram is its mobile local social and visual character which reflects how individuals are currently using social media and will continue to

do so in the future Instagram's combination of emotional visual content story telling and interaction with the community also makes it a platform that allows brands to differentiate themselves from others to become unique in what are often very saturated markets. While Instagram is a new application and previous research focuses mainly on long established social media platforms such as Facebook this thesis aims to explore the various strategic perspectives of successful social media marketing on Instagram by developing a theoretical frame work and presenting the practical strategies of three very different organisations in a multiple case study design. The framework and the case studies prove that the five identified social media dimensions content marketing engagement marketing influencer marketing hashtags and Instagram advertising are applied in practice but are adapted very individual on each organisation its goals and its target group Proceedings of the Asia-Pacific Conference on Library & Information Education & Practice 2011 (A-LIEP 2011) Fuziah Mohd. **Actor Models and Digital Natives** Tobias Fritsch, 2010-12-30 Master's Thesis from the year 2010 in the subject Sociology Media Art Music grade 1.0 University of Hagen language English abstract This thesis evaluates the role of actor models with regard to the changes in virtual environments. The most commonly used actor models the homo economicus and the homo sociologicus as well as the emotional man and several less popular models are compared with regard to their level of explanation for behavior in virtual environment. In this context online communities i.e. gaming communities are observed. The research framework and the structural conception of the measurement also are explained in detail. A significant share of the input is based onto qualitative interviews with eight different digital natives who share a common computer gaming affinity. The analysis includes qualitative interviews with these e-athletes concerning their behavior within online communities. These interviews contain interesting findings about their motivation especially the difference between virtual and real world social relationships. The analysis shows interesting results since the players differentiate in between their role as an e-athlete versus their role as a person. This leads to a multi causal influence for their behavior which cannot solely be explained with a single influence factor. Neither the homo economicus nor the homo sociologicus thus can explain their behavior on its own. Therefore this thesis discusses methods to improve the current models in order to adopt behavioral changes through virtual environments. A trade off between the most commonly models is given. Afterwards the results of the analysis are compared to the statements of the interview partners. These interviews indicate a strong personal influence from the environment on the role of a private person. Additionally the behavior as an e-athlete is also influenced by logical decisions which can be modeled through the homo economicus **University of Arkansas at Little Rock Law Review**, 2011 **Merger and Acquisition Sourcebook** Walter Jurek, 2008 **Southern Illinois University Law Journal** Southern Illinois University at Carbondale.
