Collecting the Beatles Barbara Fenick,1984-09 Macworld ,2002 **Billboard** ,1998-10-31 In its 114th year
Billboard remains the world s premier weekly music publication and a diverse digital events brand content and data licensing
platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming
media digital and mobile entertainment issues and trends **Cellular Obsession: How Smartphones, and the Internet
of Things Are Going to Change Your Life** Nick Vulich,2017-08-06 Mobile Will Change Everything Again George Orwell s
paranoid vision of 1984 is here Only it isn t Big Brother who is watching us It s Big Data Here s the deal Google Apple and
Microsoft are all attempting to do the same thing They are trying to get your device to learn enough about you so it can
anticipate what you want to do next and provide the appropriate information just as you need it Rafe Needleman described it
best in an article he authored for Yahoo Tech He said artificial intelligence will be somewhat like auto correct Your
smartphone will auto suggest what you should do next based on your history To do that your smartphone would draw on your
prior browsing history and what it knows about you from your GPS location services your text messages and your emails The
hard part is getting your phone to think contextually As human beings we can put things in context based on what s
happening now For example let s say you are sitting in your house You smell something burning and see smoke coming from
the kitchen The next thing you know the smoke alarm goes off Most people can put two and two together to determine
something is wrong They understand that maybe the house is on fire A normal person is either going to check it out or dial 9
1 1 and run out of the house screaming fire Here s a tougher one Let s say you have an appointment set to replace your
windshield at 9 15 The Glass Barn texts you to say they are running an hour behind schedule Is that okay Or would you like
to reschedule That text is buried among several other messages Most of them are junk A coupon for a dollar off a sandwich
free drinks at the bar down the street and a contest entry Which messages should your phone hide or display Most people
would say the message from the Glass Barn should be displayed first because it s more urgent But how do you teach a chunk
of metal and memory chips to make that decision That s the real challenge When contextual intelligence works it s amazing
The problem is that right now your phone gets it right less than a third of the time Google is working hard to improve on that
number Their future depends on getting it right Time Magazine ran an article by Victor Lukerson a while back titled Google
Searches for Its Future The premise was it s a whole new world out there Google became the go to search engine because of
their excellence in desktop search but mobile has changed everything If Google wants to survive they need to reinvent
themselves The future is mobile and Google has determined the only way they can survive in this new reality is to focus in
on voice search and Google Now Want to know more Buy the book *Lean why cellular is the future of everything* **Billboard**
