Metrics That Matter Zachary Bleemer,Mukul Kumar,Aashish Mehta,Chris Muellerleile,Christopher Newfield,2023-03-21

Colleges sell themselves by the numbers rankings returns on investments and top ten lists but these often mislead prospective students What numbers should they really be paying attention to High school and college students are inundated by indicators and rankings supposedly designed to help them decide where to go to college and what to study once they arrive In Metrics That Matter coauthors Zachary Bleemer Mukul Kumar Aashish Mehta Chris Muellerleile and Christopher Newfield take a critical look at these metrics and find that many of the most popular ones are confusing misleading and most importantly easily replaceable by more helpful alternatives Metrics That Matter explores popular metrics used by future and current college students with chapters focusing on colleges return on investment university rankings average student debt average wages by college major and more Written for students their families and the counselors who advise them each chapter explains a common metric s fundamental flaws when used as a basis for making important educational decisions The authors then draw on decades of scholarship from many academic fields to pair each metric with a concrete recommendation for alternative information both qualitative and quantitative that would be more useful and meaningful for students to consider They emphasize that students should be thinking beyond solely using metrics when making college decisions students should focus on their intellectual and academic education goals not just vocational or monetary ones Students reliance on certain metrics has skewed universities away from providing high quality education and distorted the perception of higher education s purpose overemphasizing private financial returns over the broader economic and social benefits of universities This book aims to facilitate important student decisions while reorienting public perceptions of higher education s values and how universities should measure their own success

The Market for Learning Hamish Coates,2016-10-29

Improving transparency is critical to the future of higher education This book articulates the role and necessity of transparency to creating substantial opportunities for innovation and transformation Current global crises imperil exactly the kinds of progress higher education has helped to create The sector must contribute now like never before But it must put its own house in order first and do a better job conveying its value and transformative potential The book offers a transparency roadmap it reveals the pressures reshaping higher education clarifies the value and nature of transparency examines emerging reporting platforms reviews improvement opportunities for students faculty institutions and systems and forecasts how to engineer important next steps The text synthesises diverse theoretical and empirical perspectives incorporating analysis of quality and productivity academic work and leadership indicators and metrics commercial trends and institutional models as well as student learning and outcomes It creates new futures for higher education by integrating and opening up issues that have been confined largely to insiders

The Return of Inequality Mike Savage,2021-05-18 A pioneering book that takes us beyond economic debate to show how inequality is returning us to a past dominated by empires dynastic elites

and ethnic divisions The economic facts of inequality are clear The rich have been pulling away from the rest of us for years and the super rich have been pulling away from the rich More and more assets are concentrated in fewer and fewer hands Mainstream economists say we need not worry what matters is growth not distribution In *The Return of Inequality* acclaimed sociologist Mike Savage pushes back explaining inequality's profound deleterious effects on the shape of societies Savage shows how economic inequality aggravates cultural social and political conflicts challenging the coherence of liberal democratic nation states Put simply severe inequality returns us to the past By fracturing social bonds and harnessing the democratic process to the strategies of a resurgent aristocracy of the wealthy inequality revives political conditions we thought we had moved beyond empires and dynastic elites explosive ethnic division and metropolitan dominance that consigns all but a few cities to irrelevance Inequality in short threatens to return us to the very history we have been trying to escape since the Age of Revolution Westerners have been slow to appreciate that inequality undermines the very foundations of liberal democracy faith in progress and trust in the political community's concern for all its members Savage guides us through the ideas of leading theorists of inequality including Marx Bourdieu and Piketty revealing how inequality reimposes the burdens of the past At once analytically rigorous and passionately argued *The Return of Inequality* is a vital addition to one of our most important public debates *Proceedings of the 2nd International Conference on Business and Policy Studies* Canh Thien Dang, Javier Cifuentes-Faura, Xiaolong Li, 2023-10-07 This proceedings volume contains papers accepted by the 2nd International Conference on Business and Policy Studies CONF BPS 2023 which are carefully selected and reviewed by professional reviewers from corresponding research fields and the editorial team of the conference This volume presents the latest research achievements inspirations and applications in applied economy finance enterprise management public administration and policy studies CONF BPS 2023 was a hybrid conference that includes several workshops offline and online around the world in Cardiff Jan 2023 London Feb 2023 and Sydney Feb 2023 Prof Canh Thien Dang from King's College London Prof Arman Eshraghi from Cardiff Business School and Prof Kristle Romero Cortés from UNSW Business School have chaired those offline workshop *The Evolution of Liberal Arts in the Global Age* Peter Marber, Daniel Araya, 2017-03-16 Advanced and developing countries across the globe are embracing the liberal arts approach in higher education to foster more innovative human capital to compete in the global economy Even as interest in the tradition expands outside the United States can the democratic philosophy underlying the liberal arts tradition be sustained Can developing countries operating under heavy authoritarian systems cultivate schools predicated on open discussion and debate Can entrenched specialist systems in Europe and Asia successfully adopt the multidisciplinary liberal arts model These are some of the questions put to leading scholars and senior higher education practitioners within this edited collection Beginning with historical context international contributors explore the contours of liberal arts education amid public calls for change in the United States the growing global interest in the approach outside the United States as

well as the potential of liberal arts philosophy in a global knowledge economy
