Memories Of The Future New York Review S Classics:

Remembering the War, Forgetting the Terror Ekaterina V. Haskins, 2024-03-19 Russian state propaganda has framed the invasion of Ukraine as a liberation mission by invoking the Soviet era myth of the Great Patriotic War 1941-45 in which the Soviet people led by Russia saved the world from the greatest evil of the twentieth century. At the same time, the Russian government has banned civil society institutions and initiatives that remind the country of the legacy of Soviet political violence. *Remembering the War, Forgetting the Terror* explores the appeal of the cult of the Great Patriotic War and the waning public interest in Soviet political terror as intertwined trends. Ekaterina V. Haskins argues that these developments are driven not only by the weaponization of the official memory of World War II but also by familial pieties and deep-seated habits of memory. Haskins uncovers how widely shared practices of remembrance have taken root and flourished through recurring exposure to war films, urban environments, popular commemorative rituals, and digital archives. Combining scholarship and personal biography, Haskins illuminates why, despite the staggering toll of World War II and internal political violence on Soviet families, most Russian citizens continue to proudly embrace their family's participation in the war effort and avoid discussion of domestic political persecution. Elegantly written and convincingly argued, this book is an important intervention into contemporary rhetoric and memory studies that will also appeal to broader audiences interested in Russia, Eastern Europe, and the war in Ukraine. [The American Monthly Review of Reviews](#), 1898 [Mind and the Frontal Lobes](#) Brian Levine, Fergus I.M. Craik, 2012-01-05 The human frontal lobes are crucial to mental functioning, yet ongoing research is still uncovering their mechanisms. This text, written by leaders in frontal lobe research, provides a state-of-the-art update of patient and neuroimaging research. **[The American Monthly Review of Reviews](#)** Albert Shaw, 1898 [Culture, Cognition, Narrative](#) Vera Nünning, Ansgar Nünning, 2025-11-14 Although it is well known that narrative impacts our modes of assessing and interpreting the world as well as the creation of cultural identities and cultural communities, there is little research on the way in which cognition, culture, and narratives intersect. Cultural narratology usually focuses on the relation between culture and narrative, while cognitive narratology explores the relation between cognition and narrative. However, the three concepts reciprocally influence each other: narratives shape cognition, just as cognitive frames and processes shape narratives. Similarly, the culture we belong to informs our cognitive processes and the way we perceive, interpret, and react to our environment. Culture and narrative also impact each other in myriad ways. Narratives are therefore at the centre of this volume, and each chapter deals with narrative either as a cognitive or performative tool relating it to either cognition or culture or to both. The volume also explores social practices of real-world storytelling, for instance in discourses on migration and the cognitive dimension of cultures that narratives provide access to. The latter includes shared self-concepts, schemata, and cultural models. This interdisciplinary volume builds conceptual bridges between cultural studies, cognitive theory, and narrative theory.
