**Hume: A Very Short Introduction** Alfred Ayer, 2000-10-12 Hume is one of the greatest of all British philosophers and even in his own lifetime was celebrated as one of the pivotal figures of the Enlightenment A central theme of his philosophy is the conviction that questions traditionally thought of as completely independent of the scientific realm questions about the mind about morality and about God for example are actually best explained using the experimental methods characteristic of the natural sciences Hume's naturalist approach to a wide variety of philosophical topics resulted in highly original theories about perception self identity causation morality politics and religion all of which are discussed in this stimulating introduction by A J Ayer himself one of the twentieth century's most important philosophers Ayer also gives an account of Hume's fascinating life and character and includes generous quotations from Hume's lucid and often witty writings **ABOUT THE SERIES** The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

**Performing Early Christian Literature** Kelly Iverson, 2021-10-07 Scholars of early Christian literature acknowledge that oral traditions lie behind the New Testament gospels While the concept of orality is widely accepted it has not resulted in a corresponding effort to understand the reception of the gospels within their oral milieu In this book Kelly Iverson reconsiders the experiential context in which early Christian literature was received and interpreted He argues that reading and performance are distinguishable media events and significantly that they produce distinctive interpretive experiences for readers and audiences alike Iverson marshals an array of methodological perspectives demonstrating how performance generates a unique experiential context that shapes and informs the interpretive process Iverson's study explores the dynamic oral environment in which ancient audiences experienced the gospel stories He shows

why an understanding of oral performance has important implications for the study of the NT as well as for several issues that are largely unquestioned by biblical scholars      Islamic Myths and Memories Itzchak Weismann, Mark Sedgwick, Ulrika Mårtensson, 2016-05-06 Islamic myths and collective memory are very much alive in today's localized struggles for identity and are deployed in the ongoing construction of worldwide cultural networks This book brings the theoretical perspectives of myth making and collective memory to the study of Islam and globalization and to the study of the place of the mass media in the contemporary Islamic resurgence It explores the annulment of spatial and temporal distance by globalization and by the communications revolution underlying it and how this has affected the cherished myths and memories of the Muslim community It shows how contemporary Islamic thinkers and movements respond to the challenges of globalization by preserving reviving reshaping or transforming myths and memories      The College Lecture Today Lee Trepanier, 2019-06-26 In an age of online education and educational philosophies like flipping the classroom does the lecture have any role in today's university Drawing from the humanities and social sciences and from a range of different types of schools The College Lecture Today makes the affirmative case for the lecture in the humanities and social and political sciences These essays explore how to lecture without sacrificing theoretical knowledge      Talking Book Topics , 2017-11      **Thinking and Reasoning: A Very Short Introduction** Jonathan St B. T. Evans, 2017-09-21 Our extraordinary capacity to reason and solve problems sets us aside from other animals but our evolved thinking processes also leave us susceptible to bias and error The study of thinking and reasoning goes back to Aristotle and was one of the first topics to be studied when psychology separated from philosophy In this Very Short Introduction Jonathan Evans explores cognitive psychological approaches to understanding the nature of thinking and reasoning problem solving and decision making He shows how our problem solving capabilities are hugely dependent on also having the imagination to ask the right questions and the ability to see things from a completely new perspective Beginning by considering the approaches of the behaviourists and the Gestalt psychologists he moves on to modern explorations of thinking including hypothetical thinking conditionals deduction rationality and intuition Covering the role of past learning IQ and cognitive biases Evans also discusses the idea that there may be two different ways of thinking arising from our evolutionary history ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable      **Psychology: A Very Short Introduction** Gillian Butler, Freda McManus, 2014-01-23 Psychology is part of everyone's experience it influences the way we think about everything from education and intelligence to relationships and emotions advertising and criminality People readily behave as amateur psychologists offering explanations for what people think feel and do But what exactly are psychologists trying to do What scientific grounding do they have for their approach This Very Short Introduction explores some of psychology's leading

ideas and their practical relevance In this new edition Gillian Butler and Freda McManus explore a variety of new topics and ways of studying the brain Until recently it was not possible to study the living human brain directly so psychologists studied our behaviour and used their observations to derive hypotheses about what was going on inside Now through neuroscience our knowledge of the workings of the brain has increased and improved technology provides us with a scientific basis on which to understand the structure and workings of the brain and allows brain activity to be observed and measured Exploring some of the most important advances and developments in psychology from evolutionary psychology and issues surrounding adolescence and aggression to cognitive psychology this is a stimulating introduction for anyone interested in understanding the human mind ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

*Ed Atkins* Carolyn Christov-Bakargiev, Marianna Vecellio, 2016 Conceived by Atkins as an artist's book the main body is a collage of imagery text and graphical elements Ed Atkins Oxford England 1982 makes videos draws and writes reflexively performing the ways in which contemporary modes of representation from bathetic poetry to computer generated animation attempt to do justice to powerfully emotional and embodied experience Atkins work is at once a disturbing diagnosis of a digitally mediated present day and an absurd prophecy of things to come It is skeptical of the promises of technology yet suggests that it is possible to salvage subjectivity through a kind of sincere burlesque of love and hate suspending a hysterical sentimentality within the desperate lives of the surrogates he creates This catalogue edited by Carolyn Christov-Bakargiev and Marianna Vecellio accompanies the exhibition developed as a collaboration between Castello di Rivoli Museo d'Arte Contemporanea and Fondazione Sandretto Re Rebaudengo With new essays by the editors and by Irene Calderoni and Chiara Vecchiarelli the book is accompanied by a scholarly timeline and an anthology that includes a selection of the artist's unpublished writings plus critical writings by Kirsty Bell Melissa Gronlund Martin Herbert Leslie Jamison Joe Luna Jeff Nagy Mike Sperlinger and Patrick Ward together with interviews by Katie Guggenheim Hans Ulrich Obrist Beatrix Ruf and Richard Whitby

Hoffman, 1923    **Psychology. Sielkunde**, 2005    **Literature of Crisis** Olga Bezhanova, 2017-07-28 The book explores novels essays and poetry published by Spanish writers in response to the global economic crisis that began in 2008 Spain has been experiencing the crisis in a particularly painful way and the artistic response to these traumatic events has been powerful and abundant The literature of the crisis is pointing to the probability that the crisis is not a temporary problem that

will be resolved once and for all if correct economic measures are taken To the contrary there is every reason to believe that the losses in long term employment the growing precariousness of work the increased economic insecurity the citizens disillusionment with the capacity of democratic governments to withstand the pressures of global capital the erosion of the welfare state and the explosive growth in inequality that we associate with the crisis are not likely to be reversed Spanish artists are exploring the reasons behind Spain's particularly painful experience of the crisis and at the same time are placing the suffering that the crisis is causing in Spain within the context of global developments that are ensuring its durability Essays by Antonio Muñoz Molina and Lucía Etxebarria novels by Rafael Chirbes Luis García Montero Benjamín Prado and Belén Gopegui and poetry by the artists who contributed to the collections titled *En legítima defensa* *Poetas en tiempos de crisis* and *Marca da España Retrato político de una sociedad en crisis* point to the necessity of expanding our vision of the crisis from the purely financial to a broader definition that will include the changes the crisis augurs for the areas of human existence that lie outside the strictly economic realm
