Library of Congress Name Headings with References Library of Congress,1979 **SME FP6 Project Catalogue** European Commission. Directorate General for Research,2008 The Sixth Framework Programme FP6 which ran from 2002 to 2006 offered innovative small to mediumsized enterprises SMEs with good research ideas but no research

facilities the possibility to outsource their research to research performers via two specific schemes devoted exclusively to the needs of SMEs Co-operative Research and Collective Research. This catalogue contains all 473 projects funded under both schemes. What is a Co-operative Research project? A Co-operative Research project supports SMEs that can innovate but which have no research facilities of their own. It brings together these smaller players from different countries with a specific research objective or need and then assigns a large part of the work required to research and development. The ownership and intellectual property rights of the research remains exclusively with the SMEs which contract out the work. FP6 placed a strong emphasis on this kind of SME support and set aside about EUR 320 million to finance Co-operative Research activities. Typical Co-operative projects last from 1 to 2 years and cost between EUR 0.5 and EUR 2 million each.
