Optimization in Chemical Engineering Fernando Israel Gómez-Castro, Vicente Rico-Ramírez, 2025-04-21 Optimization is an area in constant evolution. The search for robust optimization techniques to deal with the highly non convex models that represent the systems related to Chemical Engineering has led to important advances in the area. The need for developing economically feasible processes which are simultaneously environmentally friendly safe and controllable requires for adequate optimization strategies. Moreover finding a global optimum is still a challenge for a diversity of cases. Thus this book presents a compilation of classic and emerging optimization techniques focusing on their application to systems related to the Chemical Engineering. The book shows the applications of classic mathematical programming metaheuristic optimization methods and machine learning based strategies. The analysis of the described techniques allows the reader identifying the advantages and disadvantages of each approach. Moreover the book will discuss the perspectives for future developments on the area.

Optimization of Chemical Processes Thomas F. Edgar, David Mautner Himmelblau, Leon S. Lasdon, 2001 Written by a recognized authority in the area of optimization software this text offers an array of information on the latest advances in optimization techniques explaining both theory and practice.
