Advances in Digital Forensics XX Elizabeth Kurkowski, Sujeet Shenoi, 2025-01-06 Digital forensics

deals with the acquisition, preservation, examination, analysis, and presentation of electronic evidence. Computer networks

cloud computing, smartphones, embedded devices, and the Internet of Things have expanded the role of digital forensics

beyond traditional computer crime investigations with practically every crime now involving some aspect of digital evidence.

Digital forensics provides the techniques and tools to articulate such evidence in legal proceedings. Along with a myriad of

intelligence applications, Digital forensics also plays a vital role in cyber security investigations of security breaches, yielding

valuable information that can be used to design more secure and resilient systems. This book, *Advances in Digital Forensics XX*,

is the twentieth volume in the annual series produced by the IFIP Working Group 11.9 on Digital Forensics, an

international community of scientists, engineers, and practitioners dedicated to advancing the state of the art of research and

practice in Digital forensics. This book presents original research results and innovative applications in digital forensics. It

also highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations.

This volume contains fifteen revised and edited chapters based on papers presented at the Twentieth IFIP WG 11.9

International Conference on Digital Forensics held in New Delhi, India, on January 4-5, 2024. A total of 32 full-length papers

were submitted for presentation at the conference. The chapters present in this volume have been organized into seven

thematic sections: Themes and Issues, Mobile Device Forensics, Image and Video Forensics, Internet of Things Forensics,

Malware Forensics, Filesystem Forensics, Forensic Investigations, and **Image Processing and Communications Challenges**.

Image Processing and Communications Challenges 5 Ryszard S. Choraś, 2013-07-19 This textbook collects a series of research papers in the area of Image Processing and

Communications, which not only introduce a summary of current technology but also give an outlook of potential feature

problems in this area. The key objective of the book is to provide a collection of comprehensive references on some recent

theoretical development as well as novel applications in image processing and communications. The book is divided into two

parts. Part I deals with image processing. A comprehensive survey of different methods of image processing, computer vision, is

also presented. Part II deals with the telecommunications networks and computer networks. Applications in these areas are

considered. In conclusion, the edited book comprises papers on diverse aspects of image processing and communications.
