*Read the passage below and answer the questions on the next page.*

TikTok is a video-sharing app that has become incredibly popular among young people around the world. But what is TikTok, and where did it come from?

TikTok was launched in China in 2016 under the name Douyin. It was created by the Chinese tech company ByteDance, which saw an opportunity to capitalize on the growing popularity of short-form video content. The app quickly became a hit in China, and ByteDance decided to launch it globally under the name TikTok in 2018.

TikTok allows users to create short videos, usually between 15 and 60 seconds long, that can be set to music or other audio. Users can add effects, filters, and other creative elements to their videos to make them more engaging. The app also features a "For You" page that curates content based on each user's viewing history and preferences, making it easy to discover new and interesting content.

So why is TikTok so popular? There are several reasons. For one, it provides a fun and easy way to create and share content. The app is designed to be user-friendly, and its features make it easy to create professional-looking videos without a lot of technical skill. Additionally, TikTok is a platform that encourages creativity and self-expression, allowing users to showcase their talents and connect with others who share their interests.

TikTok has become popular due to its ability to create viral trends and challenges, which often involve popular songs or dances and can quickly spread across the platform.

You Don't Need Permission to Be Rich in the AI Era Laura Maya, 2026-01-10 The Manual of Financial Freedom You did everything you were told to do. You studied hard, earned the degree, found the stable job and followed the advice that promised security if you stayed disciplined long enough. And yet, despite doing everything right, real freedom still feels out of reach. This isn't because you failed. It's because the rules changed. You Don't Need Permission to Be Rich in the AI Era is a calm, practical guide to building wealth in a world reshaped by artificial intelligence, digital ownership and open networks. Instead of hype or shortcuts, it explains why traditional advice work harder, save more, wait longer, was designed for an economy that no longer exists. Inside, you'll learn how to use free AI tools like a first employee, how to start micro investing with as little as 10, and why modern wealth is increasingly built through ownership of digital assets rather than trading time for money. You'll also be introduced to Web3 not as speculation, but as a practical way to regain control of your money, data and digital life. The book includes a simple 90 day framework to help you build your first stream of owner-based income while keeping your day job without risky bets or drastic moves. This isn't about chasing trends. It's about creating options. About replacing anxiety with flexibility. And about realizing that wealth in the AI era isn't about what you know, it's about what you're willing to try. You don't need special credentials. You don't need connections. And you don't need permission. The door is already open. You just need to walk through it.
